

A GREAT PLACE TO LEARN ABOUT THE ENVIRONMENT, WILDLIFE, WATERSHED HEALTH AND MORE ... OR JUST TO GET OUTDOORS AND ENJOY WHAT NATURE HAS PROVIDED.

- **K-12 School groups:** Natural Resource and Science classes; Senior Culminating project work; FFA groups; Teacher in-service training and more.
- **Universities and Colleges:** class groups for study, tour or research; faculty for research and demonstration work related to courses or degree programs.
- **Community youth groups** such as: 4-H, Scouts, Campfire - and others who want to camp, learn about shrub-steppe, riparian & forest environments.
- **Professional educators** who need a place to learn through hands-on training
- **Adult Community Groups** seeking to explore and understand our natural environment

Other groups: Contact Ray Faini for special arrangements at 509-667-6540 or Email: faini@wsu.edu

Colockum Natural Resource Center

The "Colockum" is a well known wildlife area located on lands owned by the DNR and the DFW, with portions included in the Washington Dept. of Fish & Wildlife's "Wildlife Habitat Management Area".

- ◆ Rocky Mountain elk are abundant, with approximately 300 elk summering on the Center and five hundred to one thousand passing through during spring and fall migrations.
- ◆ Mule deer are resident within the Center's lands, along with upland birds such as Chukar, Hungarian partridge, doves, quail and blue and ruffed grouse.
- ◆ Many species of songbirds are found in the varied habitats. An abundance of small animals adds to the wildlife diversity.

Colockum Natural Resource Center

A joint venture of Chelan and Kittitas Counties

The "Colockum Unit" was established in 1961 as a research, teaching and extension facility of Washington State University's Department of Forestry and Range Management.

Chelan and Kittitas County's new Colockum Natural Resource Center ranges in elevation from 1800 to 5600 feet, providing a variety of habitat types suitable for natural resources education. The lower elevations typify the semiarid grasslands of eastern Washington - with and without a shrub component. The foothills are dominated by ponderosa pine and with increasing elevation, the forest becomes a mix of Ponderosa pine, Douglas fir and western larch with grand fir in moist, shaded sites. At the highest elevations, the forest is dominated by subalpine fir, Engelmann spruce and lodgepole pine. The unit also contains perennial stream (riparian) ecosystems and complete surrounding watersheds.

Activity Description	Cost Per Person/Day	For Online Payments, go to: county.wsu.edu/chelan-douglas/nrs/Colockum Reservation Form available online or from the Chelan County Extension Office.
