The troubling history of Hanford

Wednesday March 21 | 12:00 p.m.
Foley Speaker’s Room | 308 Bryan Hall

During World War II, plutonium for the Manhattan Project’s second atomic bomb was produced in Hanford, and the site was in operation until the 1980s. Come and find out more about the history of Washington’s nuclear facility.

Steve Olson is a writer and author of the recent book *Eruption: The Untold Story of Mount St. Helens.* He is a consultant writer for the National Academy of Sciences, the President’s Council of Advisors on Science and Technology, and other national organizations.
