Designing animals
The science and ethics of gene-editing

Wednesday October 23 | 4:30pm
Foley Speaker’s Room | 308 Bryan Hall

The U.N. estimates that total agricultural output needs to increase by 60% in the next century to meet growing demand. Can animal genome-editing help? What are the ethical considerations?

Jon Oatley, director of the Center for Reproductive Biology at WSU.

Paul Thompson, W.K. Kellogg Chair in Agricultural Food and Community Ethics at Michigan State University.

Samantha Noll, WSU School of Politics, Philosophy, and Public Affairs - Moderator

Co-sponsored with the School of Politics, Philosophy, and Public Affairs at WSU
