Chapter 13
Hazard Notification

A. References
   a. SPPM: 2.10, General Workplace Safety - Accident Prevention Responsibility,
   b. SPPM: 2.52 General Workplace Safety – Hazard Notification
   c. SPPM: Hazard Notification Form,
   d. WSU BPPM 90.01, Records Retention Schedule.

B. Purpose and Scope
   This chapter establishes responsibilities and procedures for reporting workplace safety
   hazards identified by CAHNRS personnel. Procedures for reporting safety hazards that
   may impact students or campus visitors are also included.

   WA State Department of Labor and Industries website provides Hazard Alerts that
   highlight emerging or newly recognized safety or health hazards in the workplace that
   can cause death or serious injury or illness.

C. Responsibilities
   CAHNRS personnel observing serious safety concerns affecting or potentially affecting
   University employees, students or the public are to immediately contact their supervisor
   and the Occupational Health and Safety (OHS) assistant director.

   Hazards that can be addressed immediately and the corrective action is within the
   employee’s ability, job description and training shall be resolved and reported by the
   employee. Hazards that cannot be immediately addressed shall be appropriately isolated
   and/or demarcated to prevent employees, students or the public contacting the hazard.

   Personnel are to report all safety hazards to the EHS OHS assistant director and safety
   committee, using the Hazard Notification form. For hazards requiring resolution by
   Facilities as a maintenance request, the OHS assistant director or their designee (e.g. via
   assignment or backup while away from work or working out of office) completes a
   myFacilities request for maintenance and communicates the appropriate urgency. Hazards
   requiring new equipment or furniture or new construction will be added to the Minor Capital
   Safety requirement list and prioritized accordingly.

   The unit responsible to address the safety hazard completes "Corrective Action" portion of
   the Hazard Notification form.

D. Reporting Process
   Workplace Hazards
   Employees observing serious safety concerns affecting or potentially affecting the safety of
   themselves or WSU personnel in their workplace are to:
   - Immediately inform the work-unit supervisor and/or manager/director;
   - Should the hazard result in an accidental injury, work related illness OR a significant
     near miss submit an incident report per the Safety Policies and Procedures Manual
SPPM: 2.52 General Workplace Safety - Hazard Notification;

- Upon review by the supervisor and a determination that corrective action cannot be implemented by the supervisor’s work unit, the workplace hazard shall be documented using the Hazard Notification form.
- The Supervisor will notify the CAHNRS Safety Committee of the hazard for evaluation. The Supervisor should report the concern to the OHS assistant director.

Public Hazards

The Environmental Health and Safety (EH&S) Department is responsible for investigating and initiating and/or coordinating corrective action for all reported public hazards. Employees observing serious safety concerns affecting or potentially affecting the safety of the general public using University facilities shall:

- Immediately contact their supervisor, the unit administrator, and the OHS assistant director.
- Follow the hazard notification procedure required in SPPM: 2.52, Accident Prevention.
- Complete and submit the Hazard Notification form.

Contractor Caused Hazards

Employees observing serious safety concerns that may affect University employees created by building or construction contractors should report the concern to Environmental Health and Safety; telephone 335-3041 and to their work-unit supervisor and/or manager/director.
