Computer Wakeup Instructions

1. From another computer open any web browser to https://wakeup.business.wsu.edu
2. Login with your ad\NID and password. You then will be presented with the following screen.

3. In the Computer Name box enter the CB number of the desktop computer you wish to wake.
4. In this example, I wish to wake up computer CB0780. Type Your CB# → Search.

5. If you see “Ping Failed,” this is probably an indicator that your computer is in sleep mode or off.

6. Click **Wake** button to issue wake command to a sleeping computer.
7. Once completed you should see a similar window to the below.

8. If ping is successful, you can use the Remote Desktop Connection (or a desktop shortcut if you already have one) to connect to your office desktop.
