Ask us about scholarships. The University has set aside scholarships specifically for engineering students at WSU North Puget Sound.

everett.wsu.edu/mech-engineering

Mechanical engineers are in high demand. Businesses throughout the greater Puget Sound area—including the Puget Sound Naval Shipyard and aerospace companies such as Boeing—are actively seeking engineers.

WSU gives you the scientific and technical foundation you need to be a mechanical engineer in virtually any industry. Students often have several job offers to choose from when they graduate.

Mechanical engineering at Everett is a two-year, full-time, daytime bachelor’s degree completion program for transfer students. Most courses are taught in person by WSU faculty in Everett, and additional courses are taught via interactive video from WSU Pullman, and online through the University’s nationally ranked Global Campus program.

WASHINGTON STATE UNIVERSITY
You can fulfill the University’s general education and pre-engineering requirements at any college and complete your degree at WSU North Puget Sound, located on the Everett Community College campus.

While it isn’t required for admission, we recommend pursuing a transfer degree if possible. The associate of science track 2 (AST-2) degree is well suited for pre-engineering study, as it includes the majority of WSU general education (UCORE) requirements and allows room for the engineering prerequisites.

**Pre-engineering requirements**

To qualify for admission to the mechanical engineering degree program at WSU North Puget Sound, you’ll need to meet the following prerequisites.

A minimum cumulative GPA of 2.5 (for all college coursework taken)

A grade of C (2.0 on a 4 point grade system) in each of the following courses:

- Calculus I
- Calculus II
- Calculus III
- Chemistry I
- Chemistry II
- Engineering Physics I
- Engineering Physics II
- Statics

In good standing to complete equivalents to the following courses before fall semester:

- Calculus IV
- Linear Algebra
- Differential Equations
- Engineering Physics III
- Mechanics of Materials
- Dynamics
- Applied Numerical Methods *
- English Composition

* Or equivalent computer programming course in MatLab, C++, or Java
