

Physics & Astronomy Colloquium

Presents

State of the Department

Dr. Brian Saam

Chair of the Department of
Physics & Astronomy,
Washington State University

The whole department--faculty, staff, students, and anyone else sharing in our common purpose--is invited to help kick-off the AY 2019-20 colloquium series with the department chair's annual report and charge for the coming year. This will not be a technical physics/astronomy colloquium but rather a review of the past year's highlights, an introduction to new members of the department, and a brief statement of the chair's outlook for the coming academic year and beyond. Come hear about plans to celebrate our 100th anniversary as a department, host the Conference on Undergraduate Women in Physics, and expand the size of the faculty by more than 10%! As always, there will be time for questions, concerns, and heckling.

Thursday, August 22, 2019
4:10 pm, Webster Room 17

Please meet our guest speaker and share in refreshments 3:45-4:10 p.m. in the foyer on floor G above the lecture hall

PHYSICS AND ASTRONOMY

100 Years of Education, Innovation, and Discovery
