

PHYSICS AND ASTRONOMY
100 Years of Education, Innovation, and Discovery

2019-2020

Distinguished Colloquium Series

Dr. J. Thomas Dickinson

Regent Professor Emeritus
Washington State University

Thursday, September 5, 4:10 pm
Webster Hall, Room 17

“Some historical highlights in the formative years of the WSU Physics and Astronomy Department”

This being the 100th Anniversary of the WSU Physics and Astronomy Department, we will examine a few of the key people in the formation of our current *small but mighty* organization and their impact in providing a foundation for our continual growth towards increasing excellence in both our teaching and our research. Because of my interest in surface and near-surface phenomena, several contributions from surface science will be emphasized.

Please meet our guest speaker at a reception to follow, 5:00 – 6:30 p.m. on the Webster Mall
