“Powering the Quantum Information - Industrial R&D for Quantum Evolution”

ColdQuanta, a start-up company based in Boulder, CO, was founded in 2007 as a spinoff from the JILA Institute and Physics Department at the University of Colorado, Boulder. ColdQuanta has focused on enabling technologies to support AMO research during its first decade and recently expanded the effort on the research and development in quantum technology including quantum computing, quantum sensing, and quantum network as the new quantum information age arises. The presentation will give an overview on some of the highlights in the current developments.

Host: Dr. Peter Engels

Meeting ID: 910 6707 5085 • Passcode: PhysAstro
