*Please meet our guest speaker and share in  
refreshments 11:45 a.m. -12:10 p.m. in the foyer on  
floor G above the lecture hall*

## “State of the Department”

**Abstract:**The whole department--faculty, staff, students, and anyone else sharing in our common mission and purpose--is invited to help kick-off the new academic year with the department chair's annual report and charge for the coming year. This will not be a technical physics/astronomy colloquium but rather a review of the past year's highlights, an introduction to new members of the department, and a brief statement of the chair's outlook for the coming academic year and beyond. As always, there will be time for questions, concerns, and heckling.
