

# Physics & Astronomy Colloquium

## Presents

She/Her

## Maren Mossman

Assistant Professor,  
University of San Diego

Thursday, March 28, 2024  
12:10 pm, Webster Room 11

Please meet our guest speaker and share in refreshments 11:45 a.m. -12:10 p.m. in the foyer on floor G above the lecture hall

## “Physics Careers and Navigating Your Path”

Physics degree holders are highly employable in both the private and public sectors. However, students and early career scientists are often unaware of the types of career paths available to them. This talk will provide an overview of career paths taken by physics degree holders, give examples of common career paths, and highlight career resources useful for exploring options and searching for and applying to jobs. The speaker will also discuss her own career path from a student at Washington State University to an assistant professor at a Primarily Undergraduate Institute, where she works with undergraduates in cold atom research.
