The Minor Capital Preservation/Renewal program affords Washington State University resources to address growing renewal and preservation requirements. This request includes system-wide projects that support minor capital infrastructure, code requirements and risk management facility improvements. These projects address health, safety, security, and environmental concerns while also addressing interior renewals, network cabling and electronics needs. Project funding is critical to ensure facilities comply with health and environmental protection regulations. Preservation funding is needed to prevent the continued decline and degradation of existing facilities (43% of which are over 50-years-old), which adversely impact the university’s ability to perform its primary mission of teaching and research.

WSU estimates the current deferred maintenance backlog exceeds $1.4 billion across all WSU campuses and research stations statewide which includes $1.17 billion for facilities and $246 million for infrastructure. This estimate was reinforced by the Higher Education Facility Comparable Framework 2016 Update. The university continues to reduce this deferred maintenance backlog, but additional requirements add to the backlog at a more rapid rate as inflationary costs of current operations increase. In the absence of inflation funding and without increased funding for facilities maintenance to reflect these dynamics, a noticeable reduction in the backlog is unlikely.

WSU’s statewide maintenance preservation plan uses a four to six-year cycle of facility and infrastructure condition assessments conducted by VFA, Inc., using a system of detailed quantitative deficiency estimates and predictive renewal models. WSU complements these assessments with in-house facility assessments, the Energy Services Performance Contract, HVAC retro-commissioning, and other technical inputs. WSU prioritizes requirements based on life safety and legal considerations, potential for further damage and deterioration of the facility, cost effectiveness, and mission support. The VFA program allows WSU to conduct a pair-wise comparison that prioritizes deficiencies based on numerous criteria.

This request includes the following minor works sub-project categories:

- Minor Works Facility Preservation $30,011,000
- Minor Works Health, Safety, Code 2,331,000
- Minor Works Infrastructure 10,658,000

$43,000,000

Listed below are some examples from these categories: The project mix and priority is fluid because conditions change daily and some projects are hybrids. For example, projects may be partially driven by health, safety and code-related concerns and also be partially driven by preservation requirements.

- Elevator/conveyance component replacement, repairs and upgrades
- Life safety/code compliance; security, environmental; public and employee liability & safety
- HVAC and Building Automation System controls; building interior repairs and renewal
- Electricity, sewer, steam, and water utility repairs/upgrades
- Mechanical systems, compressor and pump repairs and upgrades
- Network electronics and cabling within facilities
- Roofs, exterior masonry/painting, restoration, window/door replacement and repairs

2019-21 Biennium

Version: 10 2019-21 WSU Capital Budget Request
Report Number: CBS002
Date Run: 9/6/2018 10:35AM

Project Number: 40000011
Project Title: Minor Capital Preservation (MCR)

Description
Facility Preservation (Minor Works)

Growth Management impacts
WSU's physical planning policies are coordinated with many agencies and government units. The Growth Management Act and its companion Traffic Demand Management legislation and the State Environmental Policy Act, however, are applicable to WSU's physical facilities and programs. Growth Management Act (GMA)-WSU will coordinate with Counties and Municipalities throughout the State to ensure compliance with GMA. WSU will avoid construction or activities which would permanently impair "critical" areas on its campuses as they are defined in the GMA. Transportation Demand Management-A companion piece of legislation sets forth a policy for Transportation Demand Management in which the State of Washington will provide leadership. The Director of the State of Washington Department of General Administration (DGA) is required to develop a commute trip reduction plan for state agencies which are Phase I major employers WSU will conform to the plans developed by DGA. State Environmental Policy Act (SEPA)-WSU has adopted procedures set forth in the State Environmental Policy Act Handbook December 1988 and the State Environmental Policy Act Rules Chapter 197-11 Washington Administrative Code Effective April 4, 1984. Adherence to these procedures will be one of the principal means by which WSU coordinates its compliance with Growth Management requirements.

Growth Management Act (GMA)-WSU will coordinate with Counties and Municipalities throughout the State to ensure compliance with GMA. WSU will avoid construction or activities which would permanently impair “critical” areas on its campuses as they are defined in the GMA. Transportation Demand Management-A companion piece of legislation sets forth a policy for Transportation Demand Management in which the State of Washington will provide leadership. The Director of the State of Washington Department of General Administration (DGA) is required to develop a commute trip reduction plan for state agencies which are Phase I major employers WSU will conform to the plans developed by DGA. State Environmental Policy Act (SEPA)-WSU has adopted procedures set forth in the State Environmental Policy Act Handbook December 1988 and the State Environmental Policy Act Rules Chapter 197-11 Washington Administrative Code Effective April 4, 1984. Adherence to these procedures will be one of the principal means by which WSU coordinates its compliance with Growth Management requirements.

MCR Systems-EME Building-HVAC & Piping Renewal

Project Description
***DRAFT***MCR Systems-EME Building-HVAC & Piping Renewal

Location
City: Pullman County: Whitman Legislative District: 009

Project Type
Facility Preservation (Minor Works)

Growth Management impacts
WSU's physical planning policies are coordinated with many agencies and government units. The Growth Management Act and its companion Traffic Demand Management legislation and the State Environmental Policy Act, however, are applicable to WSU's physical facilities and programs. Growth Management Act (GMA)-WSU will coordinate with Counties and Municipalities throughout the State to ensure compliance with GMA. WSU will avoid construction or activities which would permanently impair "critical" areas on its campuses as they are defined in the GMA. Transportation Demand Management-A companion piece of legislation sets forth a policy for Transportation Demand Management in which the State of Washington will provide leadership. The Director of the State of Washington Department of General Administration (DGA) is required to develop a commute trip reduction plan for state agencies which are Phase I major employers WSU will conform to the plans developed by DGA. State Environmental Policy Act (SEPA)-WSU has adopted procedures set forth in the State Environmental Policy Act Handbook December 1988 and the State Environmental Policy Act Rules Chapter 197-11 Washington Administrative Code Effective April 4, 1984. Adherence to these procedures will be one of the principal means by which WSU coordinates its compliance with Growth Management requirements.

Facility Preservation (Minor Works)
Growth Management impacts

WSU's physical planning policies are coordinated with many agencies and government units. The Growth Management Act and its companion Traffic Demand Management legislation and the State Environmental Policy Act, however, are applicable to WSU's physical facilities and programs. Growth Management Act (GMA)-WSU will coordinate with Counties and Municipalities throughout the State to ensure compliance with GMA. WSU will avoid construction or activities which would permanently impair "critical" areas on its campuses as they are defined in the GMA. Transportation Demand Management-A companion piece of legislation sets forth a policy for Transportation Demand Management in which the State of Washington will provide leadership. The Director of the State of Washington Department of General Administration (DGA) is required to develop a commute trip reduction plan for state agencies which are Phase I major employers WSU will conform to the plans developed by DGA. State Environmental Policy Act (SEPA)-WSU has adopted procedures set forth in the State Environmental Policy Act Handbook December 1988 and the State Environmental Policy Act Rules Chapter 197-11 Washington Administrative Code Effective April 4, 1984. Adherence to these procedures will be one of the principal means by which WSU coordinates its compliance with Growth Management requirements.

Transportation Demand Management-A companion piece of legislation sets forth a policy for Transportation Demand Management in which the State of Washington will provide leadership. The Director of the State of Washington Department of General Administration (DGA) is required to develop a commute trip reduction plan for state agencies which are Phase I major employers WSU will conform to the plans developed by DGA. State Environmental Policy Act (SEPA)-WSU has adopted procedures set forth in the State Environmental Policy Act Handbook December 1988 and the State Environmental Policy Act Rules Chapter 197-11 Washington Administrative Code Effective April 4, 1984. Adherence to these procedures will be one of the principal means by which WSU coordinates its compliance with Growth Management requirements.

Growth Management Impacts
WSU's physical planning policies are coordinated with many agencies and government units. The Growth Management Act and its companion Traffic Demand Management legislation and the State Environmental Policy Act, however, are applicable to WSU's physical facilities and programs. Growth Management Act (GMA)-WSU will coordinate with Counties and Municipalities throughout the State to ensure compliance with GMA. WSU will avoid construction or activities which would permanently impair "critical" areas on its campuses as they are defined in the GMA. Transportation Demand Management-A companion piece of legislation sets forth a policy for Transportation Demand Management in which the State of Washington will provide leadership. The Director of the State of Washington Department of General Administration (DGA) is required to develop a commute trip reduction plan for state agencies which are Phase I major employers WSU will conform to the plans developed by DGA. State Environmental Policy Act (SEPA)-WSU has adopted procedures set forth in the State Environmental Policy Act Handbook December 1988 and the State Environmental Policy Act Rules Chapter 197-11 Washington Administrative Code Effective April 4, 1984. Adherence to these procedures will be one of the principal means by which WSU coordinates its compliance with Growth Management requirements.

Growth Management impacts

WSU’s physical planning policies are coordinated with many agencies and government units. The Growth Management Act and its companion Traffic Demand Management legislation and the State Environmental Policy Act, however, are applicable to WSU’s physical facilities and programs. Growth Management Act (GMA)-WSU will coordinate with Counties and Municipalities throughout the State to ensure compliance with GMA. WSU will avoid construction or activities which would permanently impair “critical” areas on its campuses as they are defined in the GMA. Transportation Demand Management-A companion piece of legislation sets forth a policy for Transportation Demand Management in which the State of Washington will provide leadership. The Director of the State of Washington Department of General Administration (DGA) is required to develop a commute trip reduction plan for state agencies which are Phase I major employers WSU will conform to the plans developed by DGA. State Environmental Policy Act (SEPA)-WSU has adopted procedures set forth in the State Environmental Policy Act Handbook December 1988 and the State Environmental Policy Act Rules Chapter 197-11 Washington Administrative Code Effective April 4, 1984. Adherence to these procedures will be one of the principal means by which WSU coordinates its compliance with Growth Management requirements.

SubProject Title: MCR Infrasctr-Chilled Water Distribution System

Starting Fiscal Year: 2020
Project Class: Preservation
Agency Priority: 3

Project Summary
MCR Infrasctr-Chilled Water Distribution System - Upgrade Stadium Way Chilled Water supply lines

Project Description
***DRAFT***MCR Infrasctr-Chilled Water Distribution System - Upgrade Stadium Way Chilled Water supply lines

Location
City: Pullman
County: Whitman
Legislative District: 009

Project Type
Facility Preservation (Minor Works)
Growth Management impacts
WSU's physical planning policies are coordinated with many agencies and government units. The Growth Management Act and its companion Traffic Demand Management legislation and the State Environmental Policy Act, however, are applicable to WSU's physical facilities and programs. Growth Management Act (GMA)-WSU will coordinate with Counties and Municipalities throughout the State to ensure compliance with GMA. WSU will avoid construction or activities which would permanently impair "critical" areas on its campuses as they are defined in the GMA. Transportation Demand Management-A companion piece of legislation sets forth a policy for Transportation Demand Management in which the State of Washington will provide leadership. The Director of the State of Washington Department of General Administration (DGA) is required to develop a commute trip reduction plan for state agencies which are Phase I major employers WSU will conform to the plans developed by DGA. State Environmental Policy Act (SEPA)-WSU has adopted procedures set forth in the State Environmental Policy Act Handbook December 1988 and the State Environmental Policy Act Rules Chapter 197-11 Washington Administrative Code Effective April 4, 1984. Adherence to these procedures will be one of the principal means by which WSU coordinates its compliance with Growth Management requirements.
