## **Stay Home, Stay Healthy**

### **Learning Tool for week of May 18<sup>th</sup>, 2020**

Hello 4-H Community!

This week I bring you an amazing tool from one of our awesome

volunteers: Discord! I thought about doing a quick video with you, but it turns out Discord has their very own [YouTube channel](#) where

you can learn about different features. Check out [This Video](#) for a quick introduction to Discord. (<https://youtu.be/sDoCmDUpGbY>)

Discord has some amazing potential for our current situation, but it is also a powerful communication tool that can be used when we are back to “normal” in 4-H. It allows for voice, video, and text communication within a group, or server, that you create. This is especially useful for our 4-H clubs, programs, and projects, as our fearless leaders can manage access and monitor communications for a safe, fun, and interactive virtual communication and meeting space.

Please check it out if you have never heard of it: <https://discord.com/>

If you are interested in using Discord in your club or program and need help getting started, feel free to [email me](#) (a.hernandez-hall@wsu.edu) and I will do all I can to help, or I will connect you with someone who can get you started.

Happy communicating!!
