Review: Waste, Energy, and Climate Change

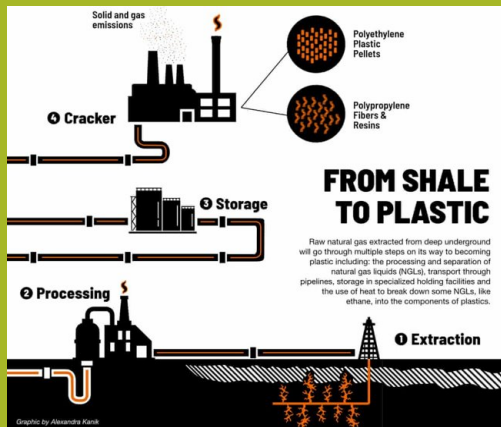

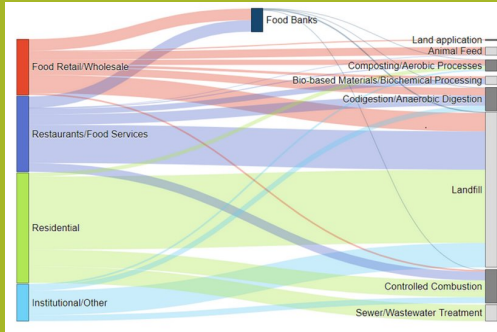

Talking about Climate Change

Food Waste

Plastic Production

Waste Incineration

<-----Overconsumption

Tonight's Learning Goals

I can recall details from our previous learning

I am able to navigate the Ecochallenge Website

I am able to share my motivations with my fellow participants

I am aware of ways I can move toward zero waste

I can identify 2 ZW initiatives that are in consideration with the state legislature

I am confident about how I can support zero waste initiatives in WA

I am able to identify a ZW challenge that I can focus on this week

WE TOO! Support
Renewable Energy

WE SAVE discarded
things,,,,,,this old boat
was headed to the
dump

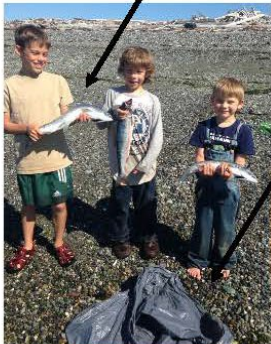

WE ALSO! Pic trash

However,,,,,,

WE ARE GUILTY of harboring CARBON CRIMINALS

Depleting Natural resources

Copious Plastic consumption

Treating wildlife like pets!

Plastic treat bags
Trips to the groomer

Frequent vet trips

Chronic Flatulence

Egregious number of Pet
food containers

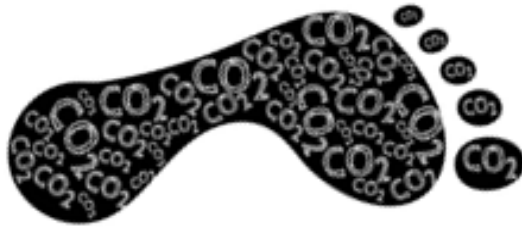

What's our Why?

Dar and Kath Christopherson ... Life Collage

I'm Isabel and this is my **why**

Reduce Carbon Footprint

Impact, Influence and Inspire

Healthier Lifestyle

Change through Actions and Education

What's my Why?

Isabel Hutson

WHAT IS MY "WHY"?

Waste makes me sad my whole life! I'm always looking for that second use.

Things made intentionally for single-use make me sad. I'm always looking for alternatives and want to encourage everyone to do so.

Art made of pop cans

Hat made of produce bag

My Community Cutlery Collection for everyone to borrow instead of buying plastic

Disposable mesh bags made whole and reusable

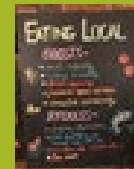

Kick the plastic habit!

What's my Why?

Mary King

I see that earth, air, water, and living beings are all connected and fragile.
