County Policy

4.6/13.4

When posting a photo of a youth in a public space, such as a media release or on a website, make every attempt to use the first or last name, not both, of the youth in conjunction with the picture. For virtual contests or virtual meetings that might include screenshots, ask that youth change their visible name to not include both first and last name before taking screenshots.

7.3.1

A member who wishes to enroll in a project that is not offered by their primary club may do so by (1) enrolling in a secondary club that offers that project, and the member must meet all requirements outlined by that club; or (2) the member may enroll in the project if they have approval from their primary club leader and they do the following:

- a. The 4-H member must be enrolled in a primary club, and they must enroll in the project in 4-H Online. 4-H staff can guide members in enrolling in projects not found in their primary club profile.
- b. Members must follow rules and guidelines created by the program that contains the project they are enrolling in. This includes event and activity participation, meeting attendance requirements, fair requirements, and safety rules.

EXCEPTION: Does not apply to animal projects, shooting sports, and food preservation. Some other higher-risk projects may also require enrollment in a club offering the project. Please contact 4-H staff.

Note: Some projects may not allow fair entry if the member is not enrolled in a club that offers the project.

7.5

A volunteer who has been inactive for three consecutive years will be asked to review all missed Annual Volunteer Updates, cover changes in policy and programming since their last active 4-H year. Additional training or review may also be required.

8.10

To go into effect October 1, 2023: Certification in Youth for the Quality Care of Animals will be required for all juniors and older youth raising livestock animals (pig, beef, sheep, goats, dairy,

market rabbits, and poultry) as 4-H projects. It is recommended for youth with fiber-producing animals. Certification prior to 2023 is encouraged. Financial support is available if needed.
