## Woohoo!

Our 4-H Technology Program was represented at the Kla Ha Ya Days parade by our committed Botsmiths team with their custom made, flag waving, teleoperated parade bot that was an amalgam of a motorized wheel chair graciously donated to the Technology Program and a another gracious donation of a human safe 6 degree of freedom pick and place robot. The team spent several weekends designing and building the merger. The experiment was a complete success, and the robot performed flawlessly during the entire parade route. It even powered itself up into the transport truck via loading ramps so we didn't have to lift it!
