Value of products sold	\$ _____
Other income from project	\$ _____
Value of animals consumed at home(if any)	\$ _____
Closing inventory value	\$ _____

TOTAL INCOME \$ _____

PROJECT INCOME OR LOSS

Total expenses subtracted from total income equals project profit or loss (circle one).

\$ _____

If total income is less than total expenses, you have lost money on your project. Find the reason and make the necessary changes if you are keeping this project as a business. Not all projects make money. For example, show animals such as in the Fitting and Showmanship contest is a cost item and the pleasure and experience of having the animal is well worth the expense.

You must keep records to have a better idea of where the money comes from and what it is spent for. Your good animals will appear on the record sheet because of their value as breeders. Animals with poor records can be spotted and sold.

Use the expense and income columns of the previous page to list all purchases made or items sold. Record the items on the date you bought or sold. Include fair premiums as an income. When items are used at home, assign a fair market value for record purposes. A fair market value is what one would have to pay a competitor or a store to buy that product. Be fair and sensible; don't try to pad your records.
