

## **Poulsbo's Fish Park**

Poulsbo's Fish Park is a nature park in the middle of a growing, busy city. Using grant funds, this project began in 2002 with the purchase of 13 acres for just over \$1 million dollars. The ongoing development has been successful using city dollars, state and federal grants, the Suquamish Tribe, property donations, various service clubs, and extensive volunteer support. The Poulsbo Fish Park citizen steering committee continues to plan and fundraise for future park development. Their time and commitment to the project is never-ending. Four property donations have added 21 acres to this open space park, and property purchases through grants on the east side of the estuary in 2011 and 2014 have expanded this park into a 40- acre urban nature park on both sides of the estuary.

Salmon runs have been low, but expect to see mostly Chum, Coho and Cutthroat Trout

For a list of recent improvements made in late 2020 and early 2021, visit:
