

HOG CARCASS DATA - KITTITAS COUNTY FAIR - 2023

INTRODUCTION AND EXPLANATION OF TERMS

The Hog Carcass Data is based on ultrasound measurements made on the live hogs at the fair. Under the current situation, it is not possible to obtain actual carcass data from the packer and the ultrasound measurements provide the best information available.

In addition to the customary placing and awards, Hog of Merit certificates are presented to the exhibitor of each Hog of Merit.

For the hogs that didn't qualify for the Hog of Merit award, the characteristic that failed to meet the required specification is highlighted.

HOG OF MERIT SPECIFICATIONS

1. Back fat - .5 to .85 inches or less adjusted rib fat.
2. Muscling - 5.0 square inches or more of adjusted loin eye area.
3. Average Daily Gain – 1.7 lbs or more of gain per day.

COLUMNS

1. Ear tag number.
2. Rank
3. Name of exhibitor
4. Pre-weight - Weight at June weigh-in.
5. Fair Weight – Weight at Fair weigh-in.
6. Placing – Ribbon earned in Market Class at Fair (Blue, Red, or White)
7. ADG - Daily gain between the June weigh-in and the fair.
8. Back fat at 10th rib - The ultrasound measurement of fat thickness.
9. LEA - The ultra-sound measurement of the loin eye area.
10. Lean Gain Per Day - The amount of lean (muscle) gained per day. This calculation accounts for the fat cover and loin eye size and is based on the amount of weight gained between the June weigh-in and the fair.
11. Hog of Merit - HOM indicates that the hog met the requirements for Hog of Merit.
12. Breeder
13. Club

Hog of Merit Requirements

2023 Swine Carcass Data Analysis

Rib fat .5-.85 in.
 ADG ≥ 1.7 lbs.
 LEA ≥ 5.0 in.²
