

LEGO WeDo 2.0

Our LEGO WeDo 2.0 kit allows participants to be introduced to entry level robotics. An updated version of LEGO's WeDo curriculum kit, this kit allows even further building options by allowing a programmed device to be powered via AA batteries instead of a USB cord so it won't be tethered to the computer when moving. It also uses Bluetooth to communicate with your computer. This kit promotes skills in computational thinking skills like logical reasoning, pattern recognition, and modeling simulations. It also allows for collaborative learning. Our kit includes computers with LEGO Education software needed to program the models. Multiple kits are available for check-out.

Kit Contents:

- LEGO WeDo 2.0 Core Set
- Laptop with Lego Education software (not pictured)
