

LEGO WeDo

Our LEGO WeDo set is an easy-to-use concept that introduces young students to robotics. Students will be able to build LEGO models featuring working motors and sensors; program their models; and explore a series of cross-curricular, theme-based activities while developing their skills in science, technology, engineering, and mathematics as well as language, literacy, and social studies. Our set includes computers with LEGO Education software needed to program the models. We have curriculum included for activities in 4 themes:

Amazing Mechanisms
Wild Animals

Play Soccer
Adventure Stories

There is an optional extension kit with an expanded selection of blocks and building activities available upon request. Multiples of each kit are available for check-out.

Kit Contents:

- LEGO’s WeDo Construction set (left)
- LEGO’s Resource set (optional; right)
- Laptop with LEGO WeDo software (not pictured)
