

# RAIN TO DRAIN

Time to slow the flow! Using curriculum developed by Penn State, this kit teaches youth about the importance of water and how we can keep it clean! This kit has a series of four activities, each building upon the other. Youth will build a “community” and find out the best ways to get water back into the ground. There are optional online activities listed at the end of the curriculum book as well. Each kit accommodates two groups of up to 10 youth each (20 youth total). Additional supplies are needed for this kit that are not provided (see list below).

Age Level: 10+; 5<sup>th</sup>-8<sup>th</sup> grade

Time: 1.5-2+ hours. Can be extended by doing the Taking It Further activities or by adding in the *No New H2O* activities (separate curriculum).

Applications: Storm Water Management; Water Cycle; Ecosystems; Urban Planning  
County Available: Pierce
