B. Discussion Items
1. (Item #2022.11.03_233_AE&SA) Rule 38B Extension Request (Exhibit 233A 233B). -B. Davis
   a. Inquiry: Data Analysis request and context for how many students are affected by this rule. -P. Buckley
      i. Response: Comparison data and detail on the student population that applied and qualified for Rule 38b is still being gathered. -B. Davis
   b. Inquiry: What are the deliverables from suspending rule 38B in between the last two years? -J. Miller
      i. Response: Review of qualifying students over time helps with rapid prototyping and wholistic assessment of student activity. Having detailed information on this population is helping the university to improve student support. -B. Davis
   c. Inquiry: Conclusions outlining the benefits of Rule 38 for WSU and addressing drawbacks of this rule for the student population. -A. Dimitrov
      i. Response: Students are taking risks by returning to WSU just as any other student that might be returning from the reinstatement process or an academic recess. The intervention is not failing the students, the student is choosing to not participate fully in the intervention. -W. Davis / T. King
   d. Inquiry: Mandatory course attendance and what are the expected increase in workload / equitability of these efforts. The addition of the additional effort that is required by this rule may apply disproportionately to departments that include freshman students. -A. Dimitrov
      i. Response: Asking students to check-in with faculty provides additional touchpoints for these students and alerts instructors to the population that may be needing extra care and can direct students to support networks accordingly. 60% of this population are STEM students. -W. Davis
e. **Inquiry:** What % of students that returned to the university under rule 38B left the STEM disciplines. -H. Jansen

   I. **Response:** This population has only been tracked for one semester, so more data is needed to build out to a larger data set. 2/3 of the Freshman population traditionally shifts their degree program, so identifying what is the driving motivation for the shift is variable. -W. Davis / T. King

   d. **Feedback:** Considerations for the idea of a once a year, in-person meeting that rotates between campuses. -J. Sabin

VI. Constituent Concerns
   A. The intent of the hybrid model of constructing Faculty Senate meetings encourages an organic opportunity for senator dialogue and engagement on every campus. Rooms have been identified on every campus. Every campus has a room capable and available for senators to connect and conduct business. -A. Goodman

   B. Constituent concerns from the college of Arts and Sciences as it relates to Fall break after midterms and momentum towards an official fall break in accordance with neighboring university practice. -T. Bennefield
      1. This is the only institution that takes a whole week for Thanksgiving and students can really lose momentum. -V. Walden.
      2. For historical context, spring break was coordinated at the same time as K-12 until standardized testing changed the spring break schedule. In tandem with this spring adjustment, the Thanksgiving break was extended to one week to accommodate time being spent with families. There was a study that supported increased retention for first year students when Fall break was pushed back to November during Thanksgiving. The October break was challenged because of the cadence of MWF courses and retention of first year students. -J. McDonald

   C. President spoke about a sustainability group. CIS constituents are requesting a status update. -L. Premo.

VII. Meeting Adjourned: 4:49.
