

UNDERGRADUATE AND PROFESSIONAL MAJOR CHANGE BULLETIN NO. 12, addendum 1

Spring 2023

--REQUIREMENTS--

The requirements listed below reflect the undergraduate major curricular changes approved by the Catalog Subcommittee since approval of the last Undergraduate Major Change Bulletin. All changes are underlined. Deletions are crossed out. The column to the far right indicates the date each change becomes effective. Note: Items marked {S} have been streamlined and do not require Catalog Subcommittee review.

Department	Proposed	Effective Date
<p>Agricultural and Food Systems Revise graduation requirements for BS in Agricultural and Food Systems, major in Agriculture and Food Security; change name of major to Human Nutrition and Food Systems</p>	<p>Agriculture and Food Security <u>Human Nutrition and Food Systems</u> (120 Credits)</p> <p>Students in this major are protectors of the world's plant-based food supply <u>the next generation of population health scientists, plant breeders, and researchers.</u> The Agriculture and Food Security major prepares students to manage plant pests and diseases from a holistic perspective. <u>This major focuses on understanding our obligation to meet the nutritional needs of a growing population by producing sustainable, nutrient-rich foods, that benefit the health of people and the planet.</u></p> <p>Students learn to understand the complexity of relationships within agricultural ecosystems, how external factors influence these systems, and how to effectively manage pests and diseases without incurring <u>research advances our ability to provide nutrient-rich food without incurring</u> undue risks to human or environmental health. Course offerings begin with a strong scientific base in biology, and <u>chemistry, and human biochemistry</u>; and expand to focus on crop science, soil science, integrated pest management, and plant pathology, <u>nutrition and health.</u></p> <p>The major is an exciting blend of classroom instruction and field experience that is tailored to the eventual employment goals of the student. Graduates who can evaluate and diagnose pest and plant disease problems and recommend economically and ecologically sound ways to correct them are in great demand. <u>Excellent employment opportunities exist within research and development programs for state, federal, and international agricultural, environmental, and regulatory agencies, agrichemical companies, health, agricultural and environmental consulting firms, local health departments, nutritionists, food processing, forest product, and vegetable and seed companies, and a wide range of other agribusiness enterprises.</u></p> <p>A student may be admitted to the Agriculture and Food Security <u>Human Nutrition and Food Systems</u> major upon making their intention known to the department.</p>	<p>8-23</p>

<p>Mechanical and Materials Engineering Revise graduation requirements for BS in Mechanical Engineering</p>	<p>Mechanical Engineering (124 Credits)</p> <p>Admission Requirements</p> <p>To be admitted into the Mechanical Engineering major, students must have earned an 83% or higher ALEKS placement score (MATH), or completed MATH 106 and 108, 171 or higher calculus course with “C” or better, or Calc AP score of 2.</p>	8-23

Transferring students must satisfy all of the above admission requirements. Students must earn a 2.6 GPA in transferred major courses and have earned a “C” or better in all transferred courses required for the ME degree.

Students transferring to degree-completion programs in Bremerton and Everett branches must have 2.6 average GPA in the following or equivalent courses, each completed with grade “C” or better: CE 211, CE 215, CHEM 105, CPT S 121 or 131, E E 221, ENGLISH 101, MATH 171, MATH 172, MATH 220, MATH 273, MATH 315, ME 116, ME 212, ME 241, PHYSICS 201 and 211, PHYSICS 202 and 212.

Benchmarks to Maintain Major in ME Status

To keep their status as Mechanical Engineering majors, students must: (1) maintain a 2.6 average GPA in major courses required for ME degree, (2) obtain a grade of C or better in all courses required for the ME degree. No more than one repeat per course is allowed in all ME and MSE courses required for the ME degree.

Major courses required for the ME degree include all engineering and computer science courses, in addition to ME, MSE, physics, chemistry, and math courses listed in the schedule of studies.

Graduation Requirement

Maintain a minimum 2.6 average GPA in major courses required for the ME degree. Receive a letter grade of C or better in all major courses.

Concentrations for BS in Mechanical Engineering

Students follow a General Path, or seek a concentration in Thermo-fluids, Manufacturing, or Autonomous Systems.

Students are encouraged to consult with their advisor at their campus of residence for approved alternative course sequences as well as allowed substitutions to the schedule studies.

¹ Must complete 4 of these 5 UCORE designations: ARTS, BSCI, DIVR, EQJS, HUM.	
² Restricted Electives (at least 6 credits): Choose from ME 310 and 311 or ME 312, ME 401, ME 405.	
³ Concentration Paths (9 credits): General Concentration: Three technical electives which may include the remaining restricted elective. Thermo Fluids Concentration: Must take ME 405, and either ME 312 or 401 from the restrictive electives; two courses from ME 419, 431, 436, and 439; and one additional technical elective. Manufacturing Concentration: Must take ME 312, and either ME 401 or 405 from the restrictive electives; ME 474 and 475; and one more technical elective. Autonomous Systems Concentration (must complete CPT S 121, 131, or ME 241 prior to beginning this concentration): Must take ME 401, and either ME 312 or 405 from the restrictive electives; two courses from CPT S 122 or 132, and ME 481; and one technical elective.	
⁴ Technical Electives for concentrations: Any 400-500-level ME, MSE, <u>E.E., CPT S.</u> or EECS course not listed as a major requirement, <u>MSE 318, 331, 332, and 333,</u> and BIO ENGR 425.
