WSU Display Garden  
Internship  
Pullman, WA  
Brittany TeVelde  
Fall 2017

Responsibilities:
- Sweeping and Clearing of walkways
- General Upkeep of plants and flower beds
- Leaf removal
- Watering
- Pruning of perennials, shrubs and vines

Summary:
This internship allowed me to gain work experience in my intended field after graduation. My tasks gave me the opportunity to learn new things about myself and if a career in the horticultural field was a good fit.

Skills Gained:
The internship increased my communication and problem solving skills. Most of the time I was working without direct supervision and had to communicate my mentor and solve many minor problems that arose on my own.

Goals Met:
- An understanding of professional and ethical responsibility
- Built my communication skills
- An understanding of how my actions effect the garden and other people using the garden.

Pruning Daylily: Before and After

Purple cone flowers that were pruned when they were done blooming

New flowers popping up and blooming. A reminder that the work is never done

Just a small portion of the leaves I removed over the course of the semester
