Overview

- Wilbur-Ellis, founded in 1921, is one of the nation's biggest family-owned businesses.
- By focusing on the necessities that people require to prosper, they have grown into a $3 billion corporation by applying their knowledge and expertise.
- Wilbur-Ellis is a world leader in improved agricultural products and technology, as in-market growth services for the livestock feed and specialized chemical industries.

Responsibilities

- Assist vineyards in attaining their objectives by inspecting their fields for diseases, weeds, and insects.
- Weekly scouting schedules
- Daily scouting summary reports to PCA’s on vineyards health
- Researching strategies to assist them in making the most of surrounding vineyards land.

 functools

(Powdery Mildew)
(Leafhoppers)
(Mealybug)

Summary

- Wilbur-Ellis has broadened my knowledge of disease and pest control for vineyards, fulfilling a portion of my goals
- Being on my own throughout the internship with so many vineyards to scout daily, my ability to make quick detailed observations allowed me to manage my time responsibly.
- From this experience I quickly adapted to the physical labor that was required
- I learned to communicate in order to learn
- This experience showed me how to deal with stressful situations
- By working with Wilbur Ellis it has helped me gain more confidence for any future jobs
