

**QUINCY, WA
JARRETT SIMMONS
SPRING 2022**

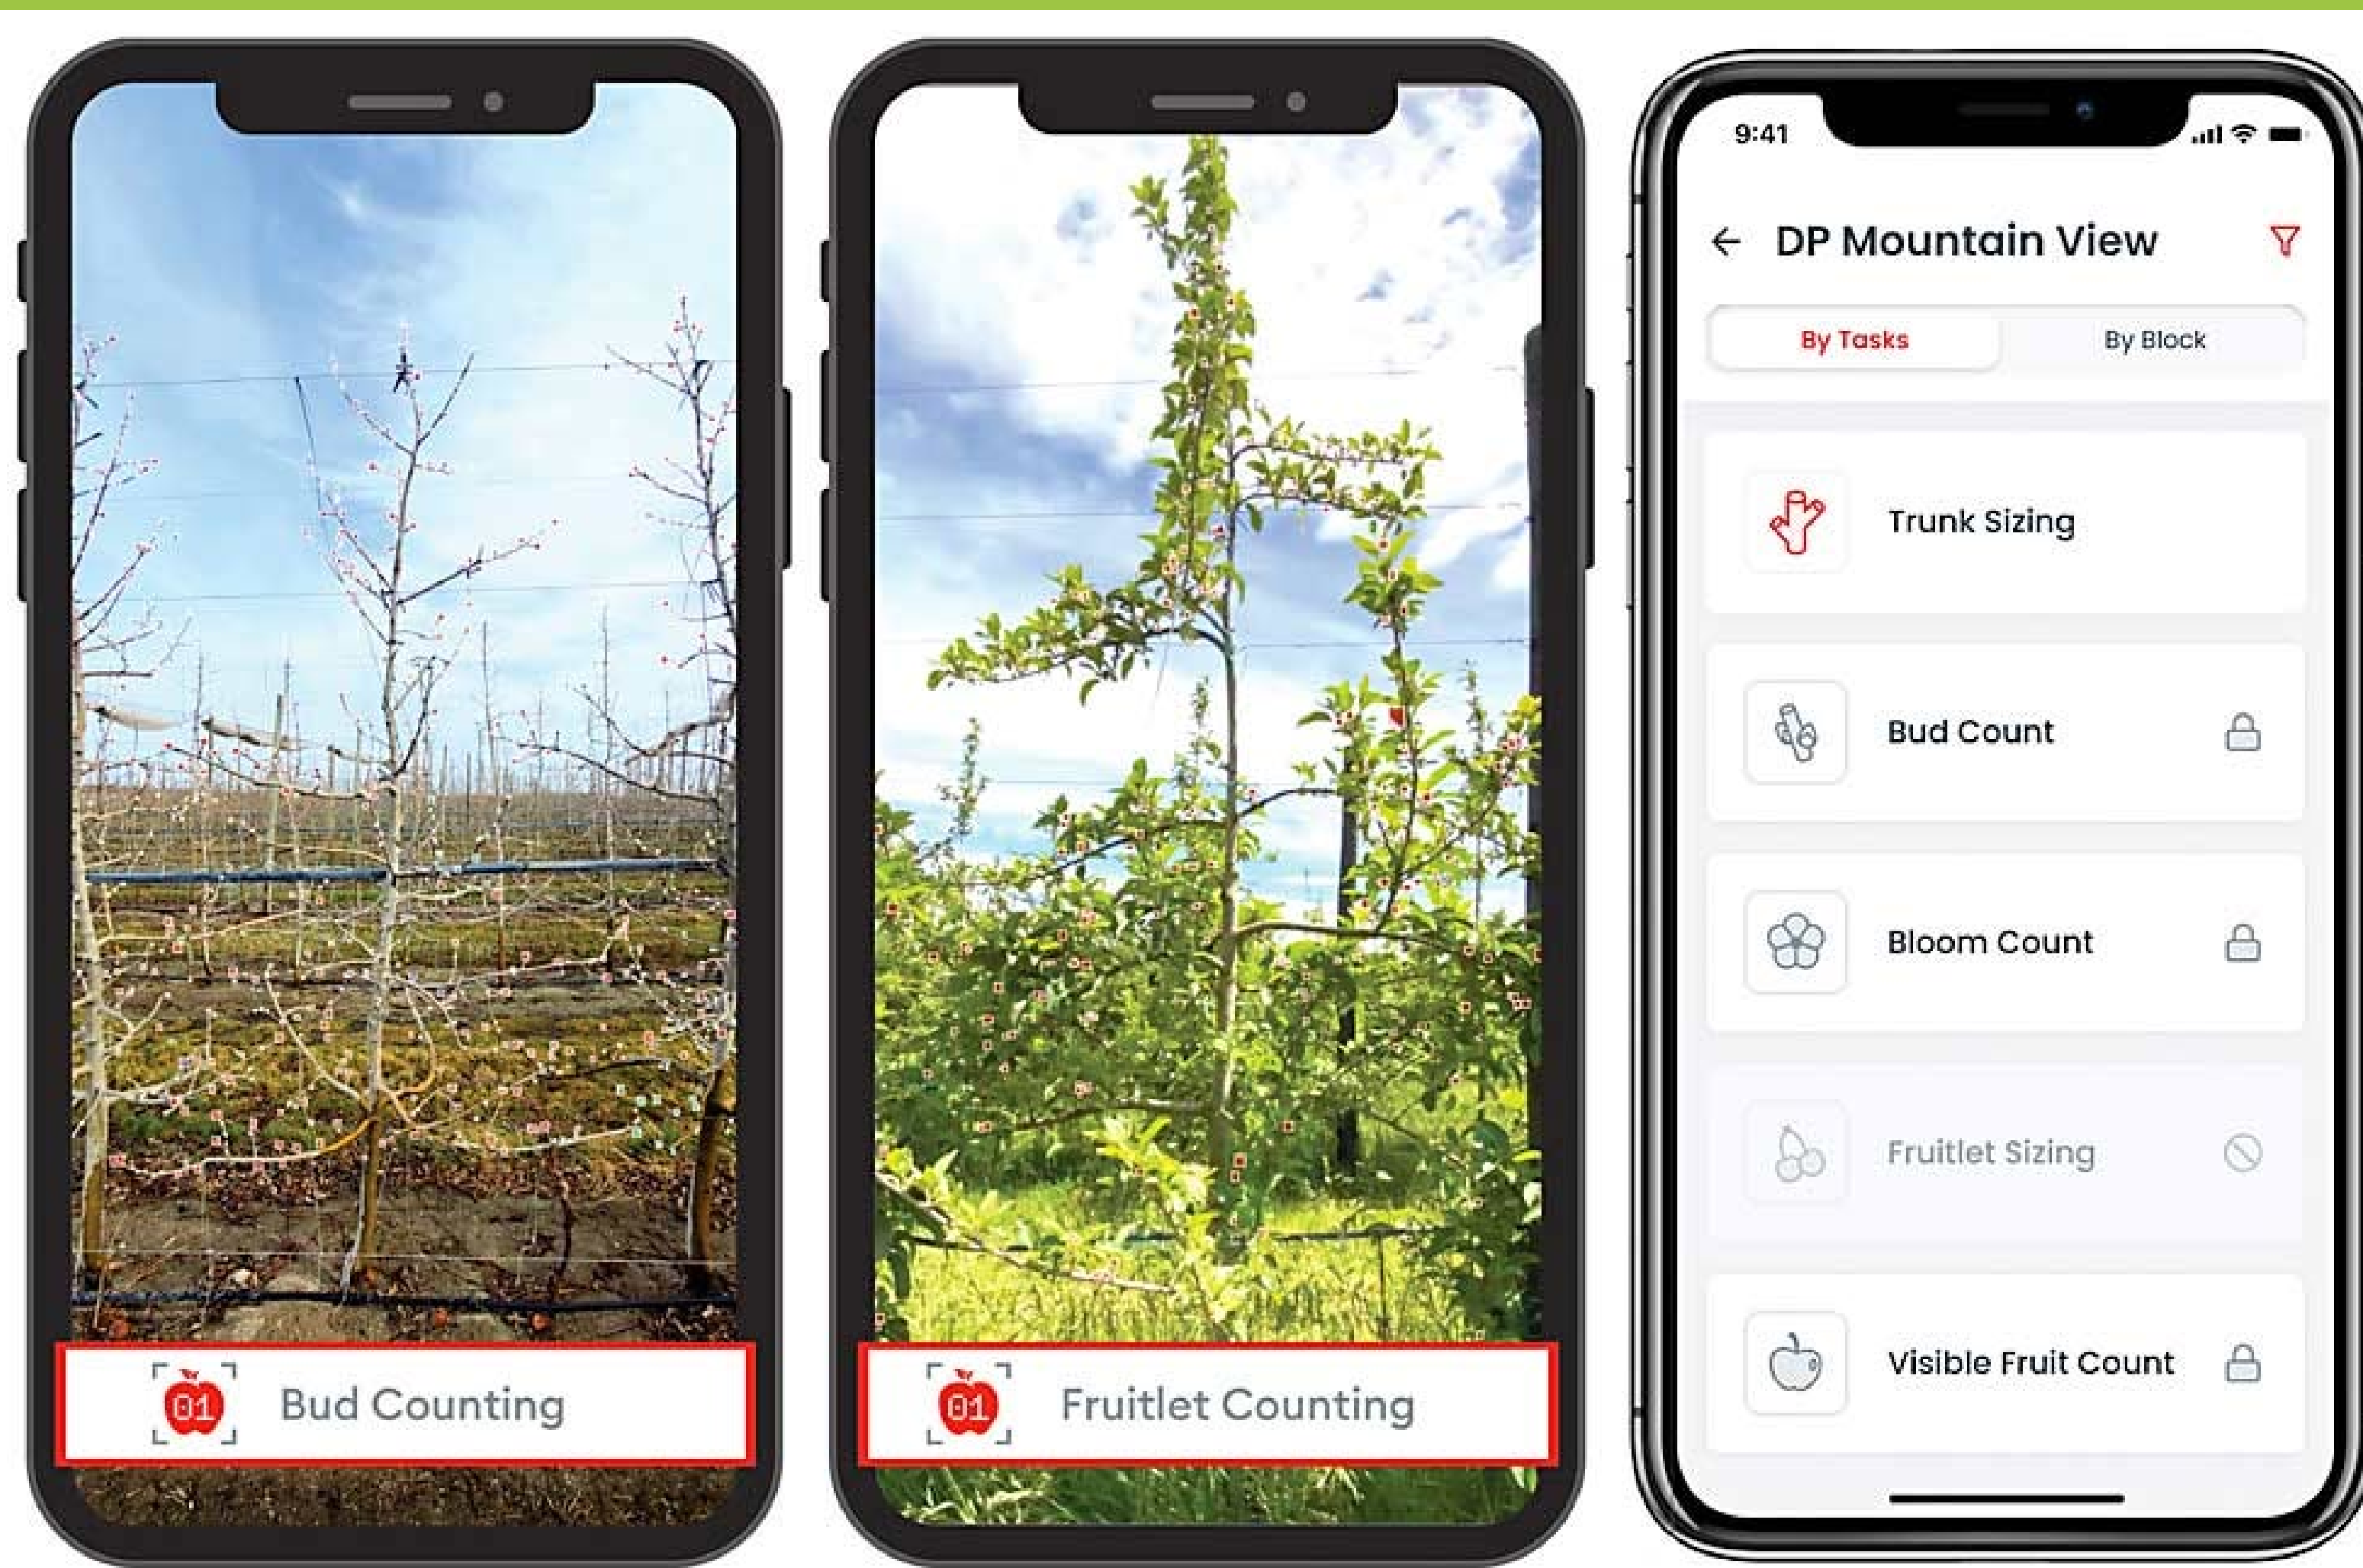

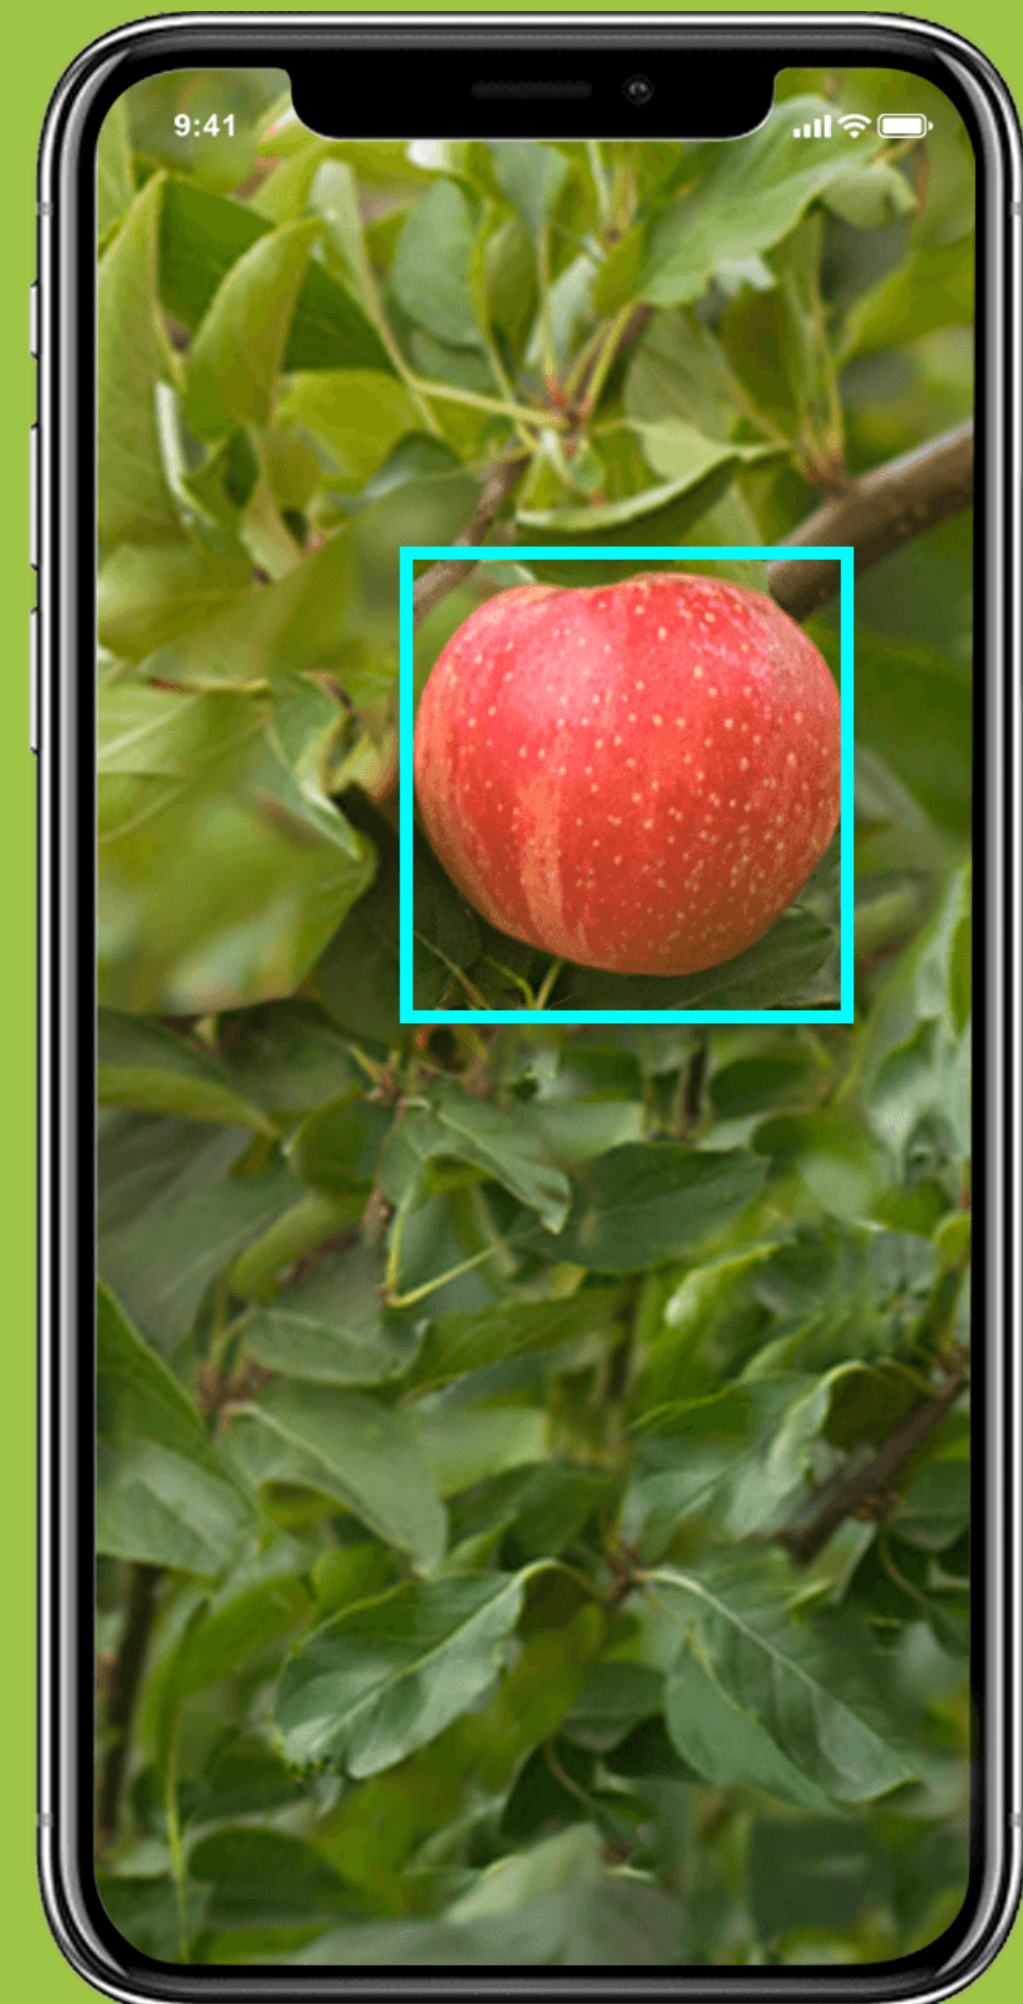

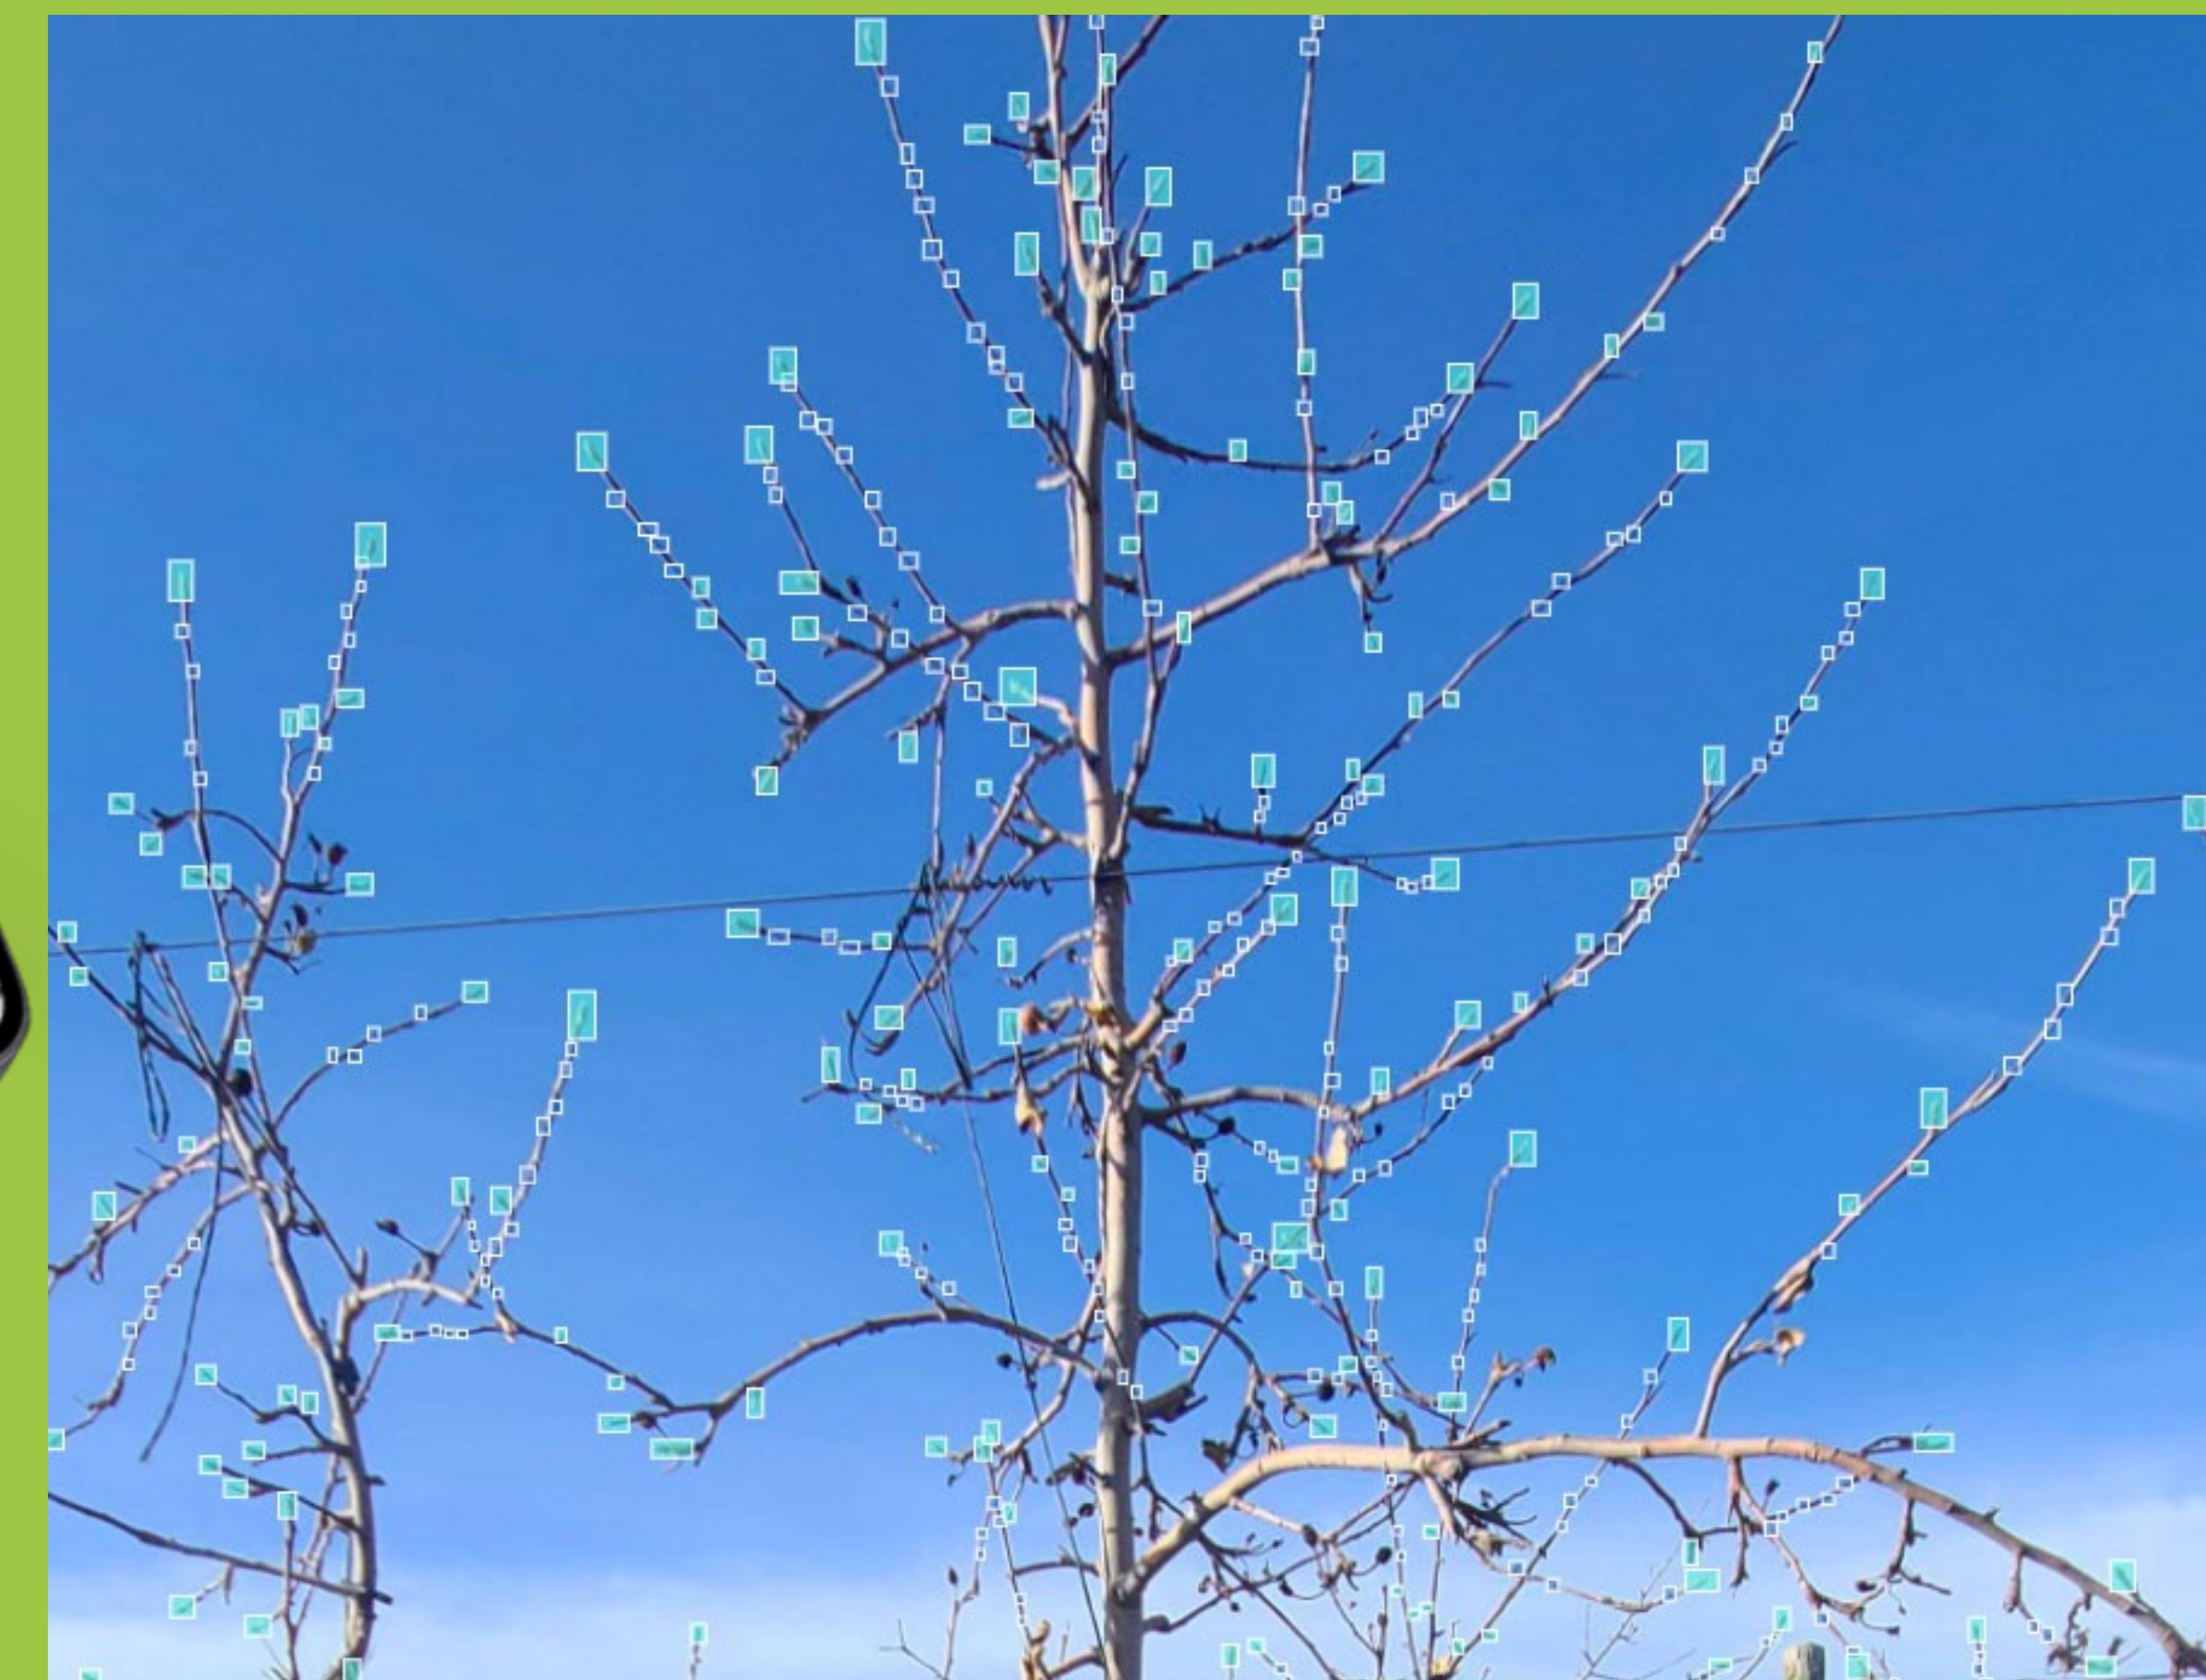

Introduction to FruitScout:

- FruitScout is a maker of groundbreaking AI-driven technology that helps tree fruit growers manage crops and deliver better outcomes.
- Their process saves growers time and delivers more accurate results over hand counting.

Responsibilities:

- Manual hand counts
- Phone scouting
- Help documents
- Customer service

Experience Summary:

- I was able to greatly improve my professional communication skills.
- I learned many new perspectives regarding crop load management.
- Going forward, I will incorporate my profession communication skills and use the overall knowledge of agriculture that I gained from this experience.
