**Course-level student learning outcomes and assessment:** Students will learn to review and compile the literature of a selected research topical area, prepare and deliver a talk with necessary visual aids in front of an audience consisting of faculty, research staff and graduate students, and participate in a Q&A session following the presentation.

The course will provide an opportunity to the student to prepare and deliver a scientific seminar on a chosen topic and will help develop skill in public speaking.

**Expectations**  
Students who register for this course must deliver a seminar on a selected topical with prior approval of the instructor. All seminars are presented in person in Pullman and are distributed to research stations via AMS. The student must prepare and submit a one-page abstract one week in advance of the seminar date for distribution. The seminar should be no longer than 45 minutes in length and should provide background to the topic followed by research carried out, an in-depth analysis and interpretation of the findings, and significance and implications of the findings. A question and answer session follows during which audience may ask seek clarification and/or additional information.
**Grading.** Seminar evaluation form will be distributed to the audience – feedback from the audience will be shared with the student. Instructor will go over the taped seminar with the student and will provide feedback.

Abstract: 20%
Presentation: 50%
Use of visual aids: 15%
