

Debra Ann Inglis, Professor Emerita, was responsible for WSU's research and extension program in Vegetable Pathology between **1993 and 2018**. The program focused primarily on the biology and management of fungal and oomycete diseases of specialty vegetables with emphasis on fresh market and processing vegetables, particularly specialty red and yellow potatoes. Dr. Inglis served as Interim Director at WSU Mount Vernon NWREC during its revitalization, 2004-2008, and was a co-founder of Pacific Northwest VEG (Vegetable Extension Group) in 2000. She also helped trained several M.S. and Ph.D. students in vegetable pathology and vegetable horticulture over the years and was Project Director and a key collaborator for three USDA AFRI SCRI grants on biodegradable plastic mulch films for agriculture. She received WSU's Sahlin Faculty Excellence Award for Leadership, 2013-14.
