# WSU Plant Pathology Seminar Series

## Changes in Trajectory: Course Adjustments in a Plant Pathology Career

**Steven Koike**, Director, TriCal Diagnostics, Hollister, CA

*February 7, 2022, 4:10 pm Pacific Time*

Steven Koike will describe his diverse travels in the field of plant pathology, and how various positive and negative factors changed the nature of his work and his career development. He will detail the most important element that fashioned his career in this field. Steve Koike is plant pathologist with and director of TriCal Diagnostics (<https://www.tricaldiagnostics.com/>), a commercial plant pathology diagnostic and research company in California. He oversees operations for the lab, leads the team in plant disease diagnostics and problem solving, carries out research on soilborne and foliar pathogens, and provides plant pathology and IPM information on agricultural commodities for clients throughout the USA. Prior to TriCal Diagnostics, Koike was an extension plant pathologist with the University of California Cooperative Extension for 28 years, conducting research and extension activities in California's central coast region.
