Comparison Groups

The NSSE Institutional Report displays core survey results for your students alongside those of three comparison groups. In May, your institution was invited to customize these groups via a form on the Institution Interface. This report summarizes how your comparison groups were constructed and lists the institutions within them.

NSSE comparison groups may be customized by (a) identifying specific institutions from the list of all 2020 and 2021 NSSE participants, (b) composing the group by selecting institutional characteristics, or (c) a combination of these. Institutions that chose not to customize received default groups that provide relevant comparisons for most institutions.

Institutions that appended additional question sets in the form of Topical Modules or through consortium participation were also invited to customize comparison groups for those reports. The default for those groups was all other 2020 and 2021 institutions where the questions were administered. Comparison group details for Topical Module and consortium reports are documented separately in those reports.

Report Comparisons

Comparison groups are located in the institutional reports as illustrated in the mock report at right. In this example, the three groups are "Admissions Overlap," "Carnegie UG Program," and "NSSE Cohort."

Reading This Report

This report consists of three sections that provide details for each of your comparison groups, illustrated at right.

Comparison Group Name

The name assigned to the comparison group is listed here.

How Group was Constructed

Indicates whether your group was drawn from a list, built based on criteria, or is the default group. If institutional characteristics were used to build your comparison group, they are listed here.

Institution List

The names, cities and states or provinces of the comparison institutions are listed for your reference. NSSE 2020 participants are identified with an asterisk.

a. The default groups are:

Comparison Group 1: For institutions not in a NSSE consortium, this group contains 2020 and 2021 NSSE institutions in the same geographic region and sector (public/private). For consortium institutions, it contains results for the other 2020 (if applicable) and 2021 consortium members.

Comparison Group 2: All other 2020 and 2021 U.S. NSSE institutions sharing your institution's Basic Carnegie Classification. (Canadian institutions are not classified by the Carnegie Foundation, and must identify a comparison group.)

Comparison Group 3: All other 2020 and 2021 U.S. NSSE institutions (2020 and 2021 Canadian participants are also included in this group for Canadian institutions).
This section summarizes how this group was identified, including selection criteria and whether the default group was used. This is followed by the resulting list of institutions in this group.

**Group description (as provided by your institution)**

Washington State University considers its NSSE results in relationship to the reported student experience at other Carnegie classified doctoral universities with very high research activity. The NSSE peer comparison group includes public doctoral universities, which have awarded at least 20 research/scholarship doctoral degrees and had at least $5 million in total research expenditures (as reported through the National Science Foundation (NSF) Higher Education Research & Development Survey (HERD)). This year’s peer comparison group includes institutions that administered NSSE in 2021.
