This one-hour, virtual interactive workshop is designed for interprofessional team members, i.e. medical assistants, nurses, pharmacists, physicians, nurse practitioners, physician assistants, social workers, and others to assess and plan care for a simulated patient who has chronic pain, takes opioids, and is at risk for developing opioid use disorder. The program invites participants to work together to identify clinic processes that support safe and effective team-based care. Prior to the workshop, facilitators will reach out to identify how the workshop can best meet the needs of your clinic.

**WHEN**
You schedule a convenient time for your clinic, including over the lunch hour or in the late afternoon or evening.

**COST**
There is no charge for the workshop.

**CREDITS**
One hour of continuing education units will be offered at no charge to participants.

**FACILITATORS**
This workshop is facilitated by Washington State University Health Sciences faculty.

**TECHNOLOGY REQUIRED**
Participants must have the ability to connect on a device with Zoom capability either individually or in a small group.

**TO SCHEDULE THIS WORKSHOP AT YOUR CLINIC**
Please contact Jennifer Anderson at: jennifer.c.anderson@wsu.edu
