Phase I - Initial Sampling to Determine Baseline Levels of Heavy Metals of Soil and Water and Soil Nutrients at Two City of Spokane Golf Courses

Objective: To determine the baseline levels of heavy metals in the soil and irrigation water and soil nutrients prior to the application of effluent water at the 2 city of Spokane golf courses.

Soil samples were taken at 6 locations at the Creek at Qualchan and 4 at Downriver Golf Courses. The Qualchan tee effluent soil sample was not taken on 5/15/08 because the tee was under construction. The tee was sampled on 6/17/08 and analyzed for heavy metals. See table below for the location of each soil sample.

Location	Turf-site	Effluent H ₂ O irrigation	City H ₂ O irrigation
Downriver (DR)	Rough	Yes	
DR	Rough		Yes
DR	Tee	Yes	
DR	Tee		Yes
Qualchan (Q)	Tee (Under Construction)	Yes	
Q	Tee		Yes
Q	Green	Yes	
Q	Green		Yes
Q	Fairway	Yes	
Q	Fairway		Yes

Mercury levels at 4 of the Creek at Qualchan locations (2 fairway and 2 tees) were < 0.013 ppm (Table 1). However, on the 2 green locations mercury levels were up to 100 times higher. These high levels of mercury could be residual mercury left over from the use of mercurial fungicides for snow mold control years ago. Levels of mercury ranged from 0.033 to 0.270 ppm at the Downriver locations (Table 2).

Table 1. Initial heavy metal levels in the soil at the Creek at Qualchan Golf Course 5/15/08.

Analyte	15 Green Effluent	15 Green Pond	16 Fairway Effluent	16 Fairway Pond	16 Tee Effluent*	16 Tee Pond	Units	Detect Limit	Analysis Method	Prep Method

Time-line:

- Task 1.** Soil sampling and analysis (Basic soil test and SAR).
Summer (15 July) and Fall (15 October) 2008
- Task 2.** Soil sampling and analysis (Trace Element Screen, Mercury, and Physical Properties).
Fall (15 October) 2008
- Task 3.** Water sampling and analysis.
Summer (15 July) and Fall (15 October) 2008
- Task 4.** Tissue testing.
Monthly throughout growing season until Fall 2008
- Task 5.** Turfgrass evaluation.
Monthly throughout growing season until Fall 2008
- Task 6.** Fertilizer program nutrient balance.
Fall 2008
- Task 7.** Phase II data analysis and 2008 report.
March 2009

Budget:

Sample analysis	\$7093
Travel	\$900
Materials & supplies	\$140
Labor	\$5200
Indirect cost (5%)	\$667

Phase II TOTAL \$14,000
