

## Interested in Engineering and Science Research? Want to know how to get started working with WSU faculty in research?

The Office of Undergraduate Research offers a "Research Skills Course" during the spring for STEM-focused students (those intending to major in science, technology, engineering, and mathematics fields).

Sign up for UNIV 497, section 13, "Peer Leadership: STEM Research Skills Course," a one-credit, graded course that meets Wednesdays from 4:10-5:00 p.m. in spring 2015.

You will:

- **Learn** about academic research
- **Gain** skills that will be transferable to a research environment
- **Explore** research opportunities at WSU in all STEM disciplines

Preference will be given to:

- Pre-certification students with intended majors in Engineering, Physical Sciences, Life Sciences, Agriculture, and Pre-Health Sciences
- Students with less than 60 credits
- Students that are interested in, but not yet working with, faculty on research

**You must also send an email** to Director of Undergraduate Research and Assistant Research Professor Shelley Pressley, [spressley@wsu.edu](mailto:spressley@wsu.edu), with a 1-paragraph description of why you are interested in getting involved in research on campus. Be sure to include your name, intended major, and number of credits you will have earned at WSU through Fall 2014 semester.

**Questions?** Contact the Office of Undergraduate Research at [UGresearch@wsu.edu](mailto:UGresearch@wsu.edu).
