March 2006

Bret Meldrum is a research assistant for the VSP, Dr. Mark Morgan is an Assistant Professor, Parks, Recreation and Tourism Department at University of Missouri, Columbia, and Dr. Steven Hollenhorst is the Director of the Park Studies Unit (PSU), Department of Conservation Social Sciences, University of Idaho. We thank Serge Herrera and the Harpers Ferry National Historical Park staff and volunteers for their assistance with this study. The VSP acknowledges the Public Opinion Lab for its technical assistance. This study was partially funded by Recreation Fee Program Funding.

Visitor Services Project Harpers Ferry National Historical Park Report Summary

- This report describes the results of a visitor study at Harpers Ferry National Historical Park (NHP) during July 22-31, 2005. A total of 605 questionnaires were distributed to visitor groups. Of those, 367 questionnaires were returned resulting in a 61% response rate.
- This report profiles a random sample of Harpers Ferry NHP visitors. Most results are presented in graphs and frequency tables. Summaries of visitor comments to open-ended questions are included in the report and complete comments are included in the Visitor Comments Appendix.
- Thirty-five percent of visitor groups were in groups of two and 36% were in groups of three or four. Sixty-seven percent of the visitor groups were family groups. Forty-seven percent of visitors were ages 36-60 years and 20% were ages 15 or younger. Fifty-eight percent of visitors went to Harpers Ferry NHP for the first time in their life.
- United States visitors were from Maryland (22%), Virginia (15%), Washington, D.C. (10%), and 38 other states. International visitors comprised 4% of the total visitation and were from England (31%), Canada (19%), and 10 other countries.
- Most visitor groups (79%) stayed at the park three or more hours. Thirty-nine percent of visitor groups stayed overnight away from home in the Harpers Ferry NHP area (within 60-miles of park).
- Prior to this visit, visitor groups most often obtained information about Harpers Ferry NHP through previous visits (51%) and friends/relatives/word of mouth (42%). Fifteen percent of visitor groups did not obtain any information before their visit. Most groups (92%) received the information they needed about the park.
- The person making the decision to visit Harpers Ferry NHP was most often the male head of household (53%), followed by the female head of household (42%). The decision to visit was most often made one to six months prior to visiting (29%). Twenty-four percent of groups made the decision less than one week prior to visiting and 21% decided on the day they received the questionnaire.
- Forty-nine percent of visitor groups' primary reason for traveling to the West Virginia Eastern Panhandle area was to visit Harpers Ferry NHP. On this visit, the most common activities were walking/hiking (82%) and viewing exhibits/museums (74%).
- Regarding use, importance, and quality of visitor services and facilities, it is important to note the number of visitor groups that responded to each question. The most used services/facilities by the 334 visitor groups included park brochure/map (82%), restrooms (80%), and visitor center (78%). The services/facilities that received the highest combined proportions of "extremely important" and "very important" ratings included restrooms (90%, N=243), trails (84%, N=123), and exhibits/museums (82%, N=219). The services/facilities that received the highest combined proportions of "very good" and "good" quality ratings included assistance from park staff (96%, N=108), exhibits/museums (90%, N=213), restrooms (90%, N=40), and park brochure/map (90%, N=243).
- The average total expenditure in and outside the park (within 60-minute drive of park) per visitor group was \$216. The median visitor group expenditure (50% of groups spent more, 50% of group spent less) was \$90. The average per capita expenditure was \$61.
- Most visitor groups (91%) rated the overall quality of services, facilities, and recreational
 opportunities at Harpers Ferry NHP as "very good" or "good." One percent of groups rated the
 overall quality as "very poor" or "poor."

INTRODUCTION

This report describes the results of a visitor study conducted at Harpers Ferry National Historical Park (NHP) during July 22-31, 2005 by the National Park Service (NPS) Visitor Services Project (VSP), a part of the Park Studies Unit at the University of Idaho.

Organization of the report

The report is organized into three sections.

- <u>Section 1</u>: **Methods**. This section discusses the procedures, limitations, and special conditions that may affect the study results.
- <u>Section 2</u>: **Results**. This section provides summary information for each question in the questionnaire and includes a summary of visitor comments. The presentation of the results of this study does not follow the same order of questions in the questionnaire. Instead, the results are presented in the following order:
 - Demographics
 - Information Prior to Visit
 - Information During Visit
 - Ratings of the Park's Services, Facilities, Resources, Qualities, Elements, and Value for Fee Paid
 - Expenditures (only presented if the questionnaire included expenditure questions)
 - Information about Future Preferences
 - Overall Quality
 - Visitor Comments

Section 3: Appendices

- Appendix 1: The Questionnaire contains a copy of the questionnaire distributed to visitor groups.
- Appendix 2: Additional Analysis contains a list of options for cross references and cross comparisons.

 These comparisons can be analyzed within park or between parks. Results of additional analyses are not included in this report as they may only be requested after this study is published.
- Appendix 3: Decision Rules for Checking Non-response Bias
- Appendix 4: Visitor Services Project Publications contains a complete list of publications by the VSP-PSU. Copies of these reports can be obtained by contacting the PSU office or visiting the website: http://www.psu.uidaho.edu/vsp/reports.htm
- Visitor Comments Appendix: A separate appendix contains visitor responses to open-ended questions. It is bound separately from this report due to its size.

Presentation of the results

Results are presented in the form of graphs (see example below), scatter plots, pie charts, tables, and text.

SAMPLE ONLY

- The figure title describes the graph's information.
- 2: Listed above the graph, the "N" shows the number of individuals or visitor groups responding to the question. If "N" is less than 30, CAUTION! on the graph indicates the results may be unreliable.
 - * appears when total percentages do not equal 100 due to rounding.
 - ** appears when total percentages do not equal 100 because visitors could select more than one answer choice.
- 3: Vertical information describes the response categories.
- Horizontal information shows the number or proportions of responses in each category.
- 5: In most graphs, percentages provide additional information.

1 Figure 4: Number of visits

METHODS

Survey Design

Sample size and sampling plan

All VSP questionnaires follow the design principles outlined in Don A. Dillman's book *Mail and Internet Surveys: The Tailored Design Method* (2000). Based on this methodology, the sample size was calculated based on park visitation statistics of previous years. To minimize coverage error, the sample size was also determined to provide adequate information about specific park sites, if requested.

Brief interviews were conducted with visitor groups, and 605 questionnaires were distributed to a random sample of visitor groups who arrived at Harpers Ferry NHP during July 22–31, 2005. Table 1 shows the numbers of questionnaires distributed at each park site. These sampling locations were selected based on park visitation statistics and advice from park staff.

| Table 1: Questionnaire distribution location N=number of questionnaires distributed | | | |
|---|-----|---------|--|
| Sampling site | N | Percent | |
| Visitor center | 400 | 66 | |
| Shenandoah St. river access | 60 | 10 | |
| Train station parking lot | 80 | 13 | |
| Lewis & Clark exhibit/Potomac River pedestrian bridge | 65 | 11 | |
| Total | 605 | 100 | |

Questionnaire design

The Harpers Ferry NHP questionnaire was developed at a workshop held with park staff to design and prioritize the questions. Some of the questions were comparable with VSP studies conducted at other parks, while others were customized for Harpers Ferry NHP. Many questions asked visitors to choose answers from a list of responses, often with an open-ended option, while others were completely open-ended.

No pilot study was conducted to test the Harpers Ferry NHP questionnaire. However, all questions followed OMB guidelines and/or were used in previous surveys. Thus, the clarity and consistency of the survey instrument have been tested and proven.

Survey procedure

Visitor groups were greeted, briefly introduced to the purpose of the study, and asked to participate. If visitors agreed, an interview lasting approximately two minutes was used to determine group size, group type, and the age of the group member (at least 16 years of age) who would complete the questionnaire. These individuals were asked for their names, addresses, and telephone numbers to mail them a reminder/thank you postcard and follow-ups. Visitor groups were given a questionnaire, asked to complete it after their visit, and return it by mail. The questionnaires were pre-addressed and affixed with a U.S. First Class postage stamp.

Two weeks following the survey, a reminder/thank you postcard was mailed to all participants. Replacement questionnaires were mailed to participants who had not returned their questionnaires four weeks after the survey. Seven weeks after the survey, a second round of replacement questionnaires were sent to visitors who had not returned their questionnaires.

Data Analysis

Returned questionnaires were coded and the information was entered into a computer using standard statistical software packages—Statistical Analysis System (SAS) and Statistical Package for the Social Sciences (SPSS). Descriptive statistics and cross-tabulations were calculated for the coded data, and responses to open-ended questions were categorized and summarized.

Limitations

This study has some limitations that should be considered when interpreting the results.

- This was a self-administered survey. In addition, respondents completed the questionnaire
 after their visit, which may result in poor recall of the visit details. Thus, it is not possible to
 know whether visitor responses reflected actual behavior.
- The data reflected use patterns of visitors to selected sites during the study period of July 22–31, 2005. The results present a 'snapshot-in-time' and do not necessarily apply to visitors during other times of the year.
- 3. Caution is advised when interpreting any data with a number of respondents less than 30, as the results may be unreliable. Whenever this occurs, the word **"CAUTION!"** is included in the graph, figure, table, or text.
- 4. Occasionally, there may be inconsistencies in the results. Inconsistencies arise from missing data or incorrect answers (due to misunderstood directions, carelessness, or poor recall of information). Therefore, refer to both the percentage and N (number of individuals or visitor groups) when interpreting the results.

Special Conditions

Throughout the survey period, Harpers Ferry NHP and the surrounding area experienced some of the highest temperatures (90+ degrees Fahrenheit) of the summer. These conditions may have kept some visitors away from the park, or shortened their visit. Overall, the weather was typical of summers in the Appalachian region. Occasional thunderstorms left the area hot and humid afterwards.

Only two ranger-led tours per day were conducted. This was the lowest number of tours conducted since 1973 and may have affected the number of visitors who participated in ranger-led programs.

Checking Non-response Bias

At Harpers Ferry NHP, 645 visitor groups were contacted and 605 of these groups (94%) accepted the questionnaire. Questionnaires were completed and returned by 367 visitor groups, resulting in a 61% response rate for this study. The two variables used to check non-response bias were age of the group member who actually completed the questionnaire and group size.

Both of these tests have a p-value smaller than 0.05, meaning that there are significant differences between respondents and non-respondents age and group size. Therefore, a potential bias is present. The data may not be a good representation of the larger park visitor population. See Appendix 3 for more details of the non-response bias checking procedure.

| Table 2: Comparison of respondents and non-respondents | | | | | |
|--|------------|---------|--------|----------|---------------------|
| | Respondent | | Non-re | spondent | |
| Variable | N | Average | N | Average | p-value (t-test) |
| Age | 354 | 48.3 | 225 | 41.2 | 0.039 |
| Group size | 365 | 4.2 | 232 | 3.6 | 0.015 |

RESULTS

Demographics

Visitor group size

Question 11a

On this visit, how many people were in your personal group, including yourself?

Results

- Visitor group size ranged from 1 person to 40 people.
- 35% of visitor groups consisted of two people (see Figure 1).
- 36% had 3 or 4 people.
- 27% had 5 or more people.

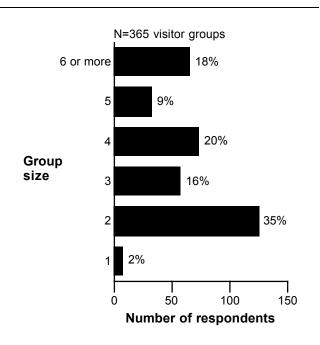

Figure 1: Visitor group size

Visitor group type

Question 13

On this visit, what kind of personal group (not guided tour/school group) were you with?

Results

- 67% of visitor groups were made up of family members (see Figure 2).
- 12% were with friends.
- 11% were with family and friends.
- 7% traveled alone.
- "Other" groups (3%) included:

Teachers Scouts Organizations School camp

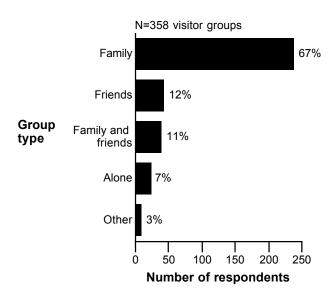

Figure 2: Visitor group type

^{*} total percentages do not equal 100 due to rounding

^{**} total percentages do not equal 100 because visitors could select more than one answer

Visitors with organized groups

Question 12a

On this visit, were you and your personal group with a guided tour group?

Results

- 98% of visitor groups were not with a guided tour group on this visit (see Figure 3).
- 2% were with a guided tour group.

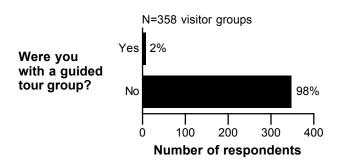

Figure 3: Visitors with a guided tour group

Question 12b

On this visit, were you and your personal group with a school/educational group?

Results

- 98% of visitor groups were not with a school/educational group (see Figure 4).
- 2% of visitor groups were with a school/educational group.

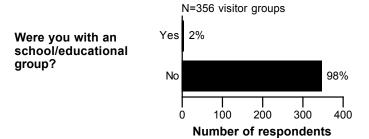

Figure 4: Visitors with a school/educational group

Number of visits to park in lifetime

Question 15

For you and your personal group on this visit, please indicate the number of visits to Harpers Ferry NHP during your lifetime (including this visit).

Note: Response was limited to seven members of each personal group.

Results

- 58% of visitors visited the park for the first time in their life (see Figure 5).
- 18% visited the park twice.
- 24% visited the park three or more times.

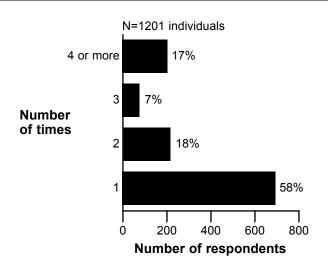

Figure 5: Number of visits to park in lifetime

^{*} total percentages do not equal 100 due to rounding

^{**} total percentages do not equal 100 because visitors could select more than one answer

Visitor age

Question 15

For you and your personal group on this visit, please indicate your current age.

Note: Response was limited to seven members of each personal group.

Results

- Visitor ages ranged from 1 to 93 years old
- 47% were in 36-60 age group.
- 20% of visitors were 15 years or younger (see Figure 6).
- 15% were 61 years or older.

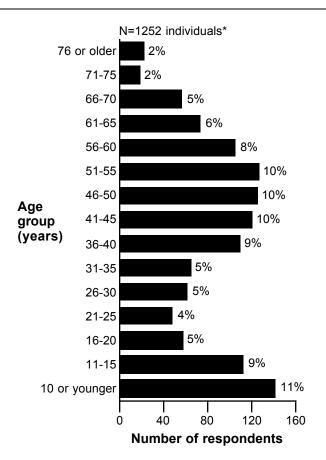

Figure 6: Visitor ages

^{*} total percentages do not equal 100 due to rounding

^{**} total percentages do not equal 100 because visitors could select more than one answer

Visitors with disabilities/impairments

Question 14a

Does anyone in your group have any disabilities/impairments that limited their ability to visit Harpers Ferry NHP?

Results

 94% of visitor groups did not have any members with disabilities/ impairments that affected their park experience (see Figure 7).

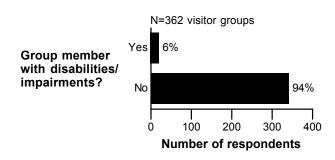

Figure 7: Visitors with disabilities/impairments

Question 14b

Because of the disability/impairment did you encounter any access/service problems in the park?

Results

 76% of visitor groups that had members with disabilities/impairments encountered access/service problems (see Figure 8). Interpret with CAUTION!

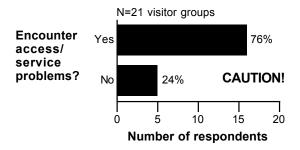

Figure 8: Visitors who encountered access/service problems due to disabilities/impairments

Question 14c

If Yes, what was the problem?

Results

• Problems stated by visitor groups were:

Steep hills
No handrails
Sidewalk difficulty with wheelchair
Parking difficulty
Limited pet access

^{*} total percentages do not equal 100 due to rounding

^{**} total percentages do not equal 100 because visitors could select more than one answer

International visitors' country of residence

Question 15

For you and your personal group on this visit, please indicate the name of your foreign country.

Note: Response was limited to seven members of each personal group.

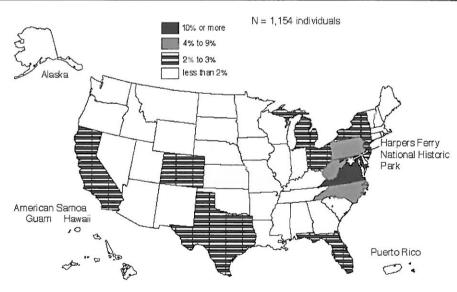

Results

- As shown in Table 3, international visitors comprised 4% of total visitation to Harpers Ferry NHP.
- 31% of international visitors came from England.
- · 19% came from Canada.
- Smaller proportions came from 10 other countries.

Table 3: International visitors' country of residence*

| | | Percent of international | Percent of total visitors |

U.S. visitors' state of residence (continued)

Question 15
For you and your group on this visit, please indicate your U.S. Zip Code.

Note: Response was limited to seven members of each personal group.

Results

- U.S. visitors comprised 96% of visitors to the park (see Table 4 and Map 1).
- 22% of U.S. visitors came from Maryland.
- 15% came from Virginia.
- 10% came from Washington, D.C.
- 9% came from Pennsylvania.
- Smaller proportions came from 37 other states.

Table 4: United States visitors' state of residence*

| State | Number of visitors | % of U.S. visitors N=1,154 individuals | % of total visitors N=1,196 individuals |
|------------------|--------------------|--|---|

Information Prior to Visit

Information sources prior to visit

Question 1a

Prior to your visit, how did you and your group obtain information about Harpers Ferry NHP?

Results

 85% of visitor groups obtained information about the park prior to their visit (see Figure 9).

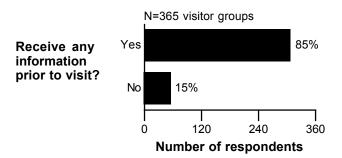

Figure 9: Visitors who obtained information about the park prior to this visit

 As shown in Figure 10, of those who obtained some information (85%), the most common sources of information included:

> 51% Previous visits 42% Friends/relatives/word of mouth 22% Travel guides/tour books 21% NPS park website

Other information sources (10%) were:

Appalachian Trail Conservancy Teachers Signs along the road

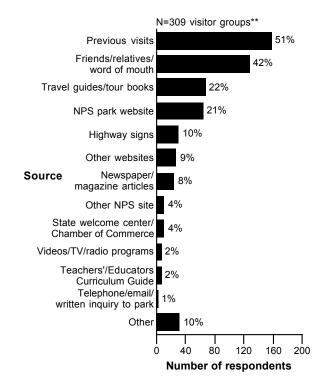

Figure 10: Sources of information used by visitor groups prior to this visit

^{*} total percentages do not equal 100 due to rounding

^{**} total percentages do not equal 100 because visitors could select more than one answer

Question 1b

From the sources you used prior to this visit, did you and your group receive the type of information about Harpers Ferry NHP that you needed?

Results

 92% obtained information they needed to prepare for this trip to the park (see Figure 11).

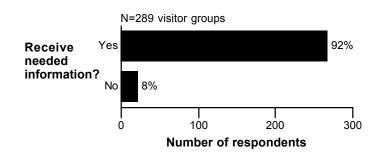

Figure 11: Visitor groups who obtained needed information prior to this visit to Harpers Ferry NHP

Question 1c

If No, what additional information did you and your group need?

Results

 Additional information that visitor groups needed but was not available through these sources included:

> Lodging information Specific directions to the park Pet information Entrance fees Parking information Special events

Decision maker and timing of visit

Question 2a

Prior to your visit, who in your group made the decision to visit Harpers Ferry NHP?

Results

- 53% of visitor groups had the decision made by the "male head of household," as shown in Figure 12.
- "Other" individuals (19%) that made the decision to visit the park for visitor group were:

Friends
Co-workers
Mutual decision
Male and female head of household
Consensus
Everyone

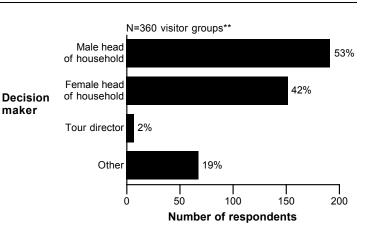

Figure 12: Visitor group decision maker

^{*} total percentages do not equal 100 due to rounding

^{**} total percentages do not equal 100 because visitors could select more than one answer

Question 2b

When did you and your group make the decision to visit Harpers Ferry NHP?

Results

- 29% of visitor groups decided to visit one to six months ago (see Figure 13).
- 24% decided less than one week ago.
- 21% decided to visit on the day they received the questionnaire.

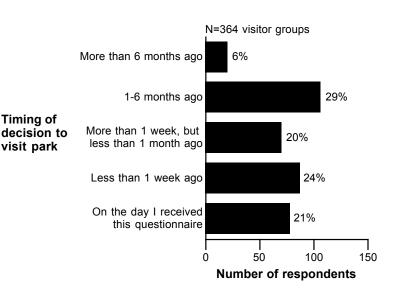

Figure 13: Timing of decision to visit Harpers Ferry NHP

Primary reason for visiting the West Virginia Eastern Panhandle area

Question 3

On this visit, what was the primary reason that you and your group visited the West Virginia Eastern Panhandle area?

Results

- 17% of visitor groups were residents of the area
- 49% of non-resident visitor groups visited Harpers Ferry NHP as the primary reason for visiting the West Virginia Eastern Panhandle area (see Figure 14).
- "Other" reasons (15%) for visiting were:

In-route to other locations Hiking/outdoor activities

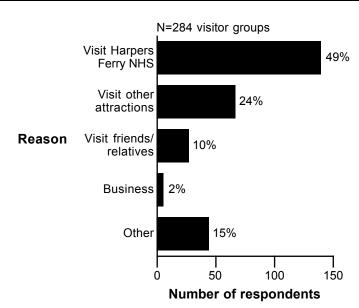

Figure 14: Visitor groups' primary reason for visiting the West Virginia Eastern Panhandle area

Places visited in the area

Question 4

For this visit to Harpers Ferry NHP, what places in the area (within a 60-minute drive of the park) did you and your group visit?

Results

- 31% of visitor groups traveled to Gettysburg National Military Park (see Figure 15).
- 30% visited Antietam National Battlefield.
- Table 5 shows the "other" areas (38%) mentioned by visitor groups.

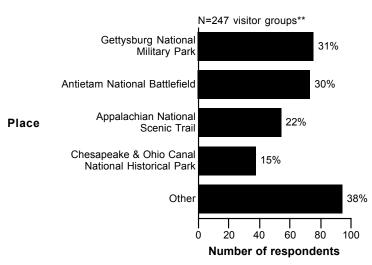

Figure 15: Places in the area (within a 60-minute drive of park) that groups visited

Information During Visit

Length of stay

Question 5a

On this visit, how long did you and your group stay at Harpers Ferry NHP on the day you received this questionnaire?

Results

 79% of visitor groups visited for 3 or more hours (see Figure 16).

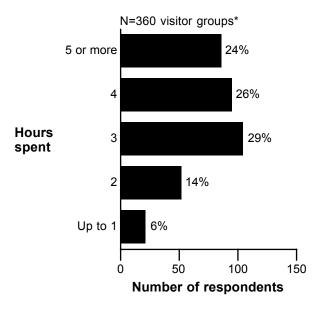

Figure 16: Number of hours spent at Harpers Ferry NHP on the day the questionnaire was received

Question 5b

Did you and your group visit Harpers Ferry NHP on more than one day during your stay in the area?

Results

 7% of visitor groups spent more than one day visiting the park while in the area (see Figure 17).

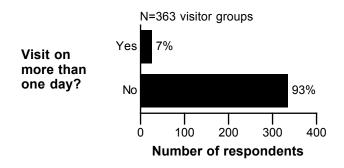

Figure 17: Visitor groups that visited Harpers Ferry NHP more than one day while in the area

^{*} total percentages do not equal 100 due to rounding

^{**} total percentages do not equal 100 because visitors could select more than one answer

Question 5c

If Yes, on how many days did you visit?

Results

 83% of visitor groups that visited Harpers Ferry NHP more than one day, came two days (see Figure 18). Interpret with CAUTION!

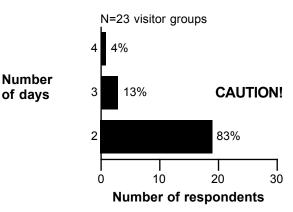

Figure 18: Number of days that visitor groups visited Harpers Ferry NHP

Number of vehicles used

Question 11b

For this visit to Harpers Ferry NHP, please list the number of vehicles in which you and your group arrived.

Results

 85% of visitor groups used one vehicle to travel to Harpers Ferry NHP (see Figure 19).

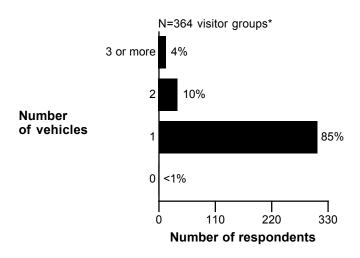

Figure 19: Number of vehicles used by visitor groups to travel to Harpers Ferry NHP

^{*} total percentages do not equal 100 due to rounding

Safety concerns while visiting the park

Question 18a

For the question below, please indicate from 1 to 5 how safe you and your group felt from crime and accidents during this visit to Harpers Ferry NHP.

How safe did you and your group feel in Harpers Ferry NHP?

Results

- The majority of visitor groups felt very safe in all safety concerns (see Table 10).
- For personal property-from crime, 5% of visitor groups felt "very unsafe" or "somewhat unsafe."
- For personal safety-from crime, 4% of visitor groups felt "very unsafe" or "somewhat unsafe" during their visit.
- For personal safety-from accidents, 5% of visitor groups felt "very unsafe" or "somewhat unsafe."
- Visitor groups explained their safety concerns as:

Traffic Motorcycles Rivers Steep steps Lack of rangers on trails

| Table 10: Safety concerns while visiting the park* N=number of visitor groups who rated each element | | | | | | |

What visitors liked least

Question 24b

What did you and your group like least about your visit to Harpers Ferry NHP?

Results

- 55% of visitor groups (N=202) responded to this question.
- Table 13 shows the summary of visitor comments. Complete comments are in the Visitor Comments Appendix.

Table 13: What visitors liked least

APPENDICES

Appendix 1: The Questionnaire

Appendix 2: Additional Analysis

The Visitor Services Project (VSP) offers the opportunity to learn more from VSP visitor study data. Additional analysis can be done using the park's VSP visitor study data that was collected and entered into the computer. Two-way and three-way cross tabulations can be made of any of the characteristics listed below. Be as specific as possible-you may select a single programs/service/facility instead of all that were listed in the questionnaire. Include your name, address, and phone number in the request.

- Sources of information prior to visit
- Received needed information?
- Who made the decision to visit Harpers Ferry NHP
- When was the decision made to visit Harpers Ferry NHP
- Primary reason for visiting the West Virginia Eastern Panhandle
- Other places visited in the area
- · Length of visit
- Number of days visited
- Sites visited in the park
- Sites visited in Lower Town
- Activities participated in
- Services and facilities used in nearby communities
- Overnight stay away from home/number of nights
- Type of lodging

- Visitor services and facilities used
- Importance of visitor services and facilities
- Quality of visitor services and facilities
- · Group size
- · Number of vehicles used
- Guided tour group
- School/educational tour group
- Group type
- Visitors with disabilities/ impairments
- Service/access problems
- Visitor age
- Zip code/state of residence
- Country of residence
- Number of times visited the park in visitor lifetime
- Traffic elements affecting park experience
- Elements affecting park experience
- · Opinions about safety in park

- Total expenditures in and outside of park
- Number of children covered by expenses
- Number of adults covered by expenses
- Expenditures within park
- Expenditures outside park
- Visitor opinions about fees
- Sources that help develop an appreciation for the park
- Information learned on this visit
- Information interested in learning on a future visit
- Preference of learning method on a future visit
- Overall quality of visitor services and facilities

Appendix 3: Decision Rules for Checking Non-response Bias

There are several methods for checking non-response bias. However, the most common way is to use some demographic indicators to compare between respondents and non-respondents (Dey 1997; Salant and Dillman 1994; Dillman 2000; Stoop 2004). In this study, group size and age of the group member (at least 16 years old) completing the survey were the two variables that were used to check for non-response bias.

Two-independent sample T-tests were used to test the differences between respondents and non-respondents. The p-values represent the significance levels of these tests. If p-value is greater than 0.05 the two groups are judged to be insignificantly different. In regard to age difference, various reviews of survey methodology (Dillman and Carley-Baxter 2000; Goudy 1976, Filion 1976, Mayer and Pratt Jr. 1967) have consistently found that in public opinion surveys, average respondent ages tend to be higher than average non-respondent ages. This difference is often caused by other reasons such as availability of free time rather than problems with survey methodology. In addition, because unit of analysis for this study is a visitor group, the group member who received the questionnaire may be different than the one who actually completed it after the visit. Sometimes, the age of the actual respondent is higher than the age of the group member who accepted the questionnaire at the park. Thus, a 5-year difference in average age between respondents and non-respondents is an acceptable justification.

Therefore, the hypotheses for checking non-response bias are:

- 1. Average age of respondents average age of non-respondents ≤ 5
- 2. Average group size of respondents average group size of non-respondents = 0

As shown in Table 2, the p-values for both of these tests are less than 0.05 indicating a significant difference between respondents and non-respondents age and group size. Thus, non-response bias is potentially present. The data may not be a good representation of the larger park visitation population.
