RE: Center Closure: Washington State University Monoclonal Antibody Center

On behalf of my Research and Arts Committee (RAC) co-chair, Dr. Jeb Owen, and the rest of the RAC members, I am writing to inform you that the Research and Arts Committee voted to approve the closure request for the Washington State University Monoclonal Antibody Center. This vote was taken on February 10, 2021. The director will be submitting an application to establish it as a collaborative unit, rather than center status.

Note. A discontinuation form supporting this request from the center director and approved by the oversight authority is also attached.
