RE: Health Sciences proposal to expand WSU Teaching Portfolios

On behalf of the FAC, I am writing to recommend Faculty Senate approval of the attached proposal to expand WSU teaching portfolios for the health sciences. The motion passed with majority approval and recommendation that the proposal be forwarded to the Faculty Senate for discussion and approval.

Briefly, the proposal specifies a 4-year pilot during which the four health science colleges would be released from the 5-page limitation on the Teaching Portfolio as currently specified in the Faculty Manual (III.C.5.d. Teaching Portfolio) followed by a report back on multiple outcomes (specified within) and recommendations moving forward. Please also see the attached letters of support from the College of Pharmacy, College of Nursing, College of Veterinary Medicine, and College of Medicine.
