David Christensen
*Program Development Manager,
Water Resources Program
WA Dept. of Ecology*

David Christensen six years' experience as the Program Development Manager for the Washington State Department of Ecology's Water Resources Program. He works with the legislature and elected officials, and leads a team that develops state policies and rules on water resource management in Washington. David has more than 20 years' professional experience in water resource, public health and environmental management. David holds a B.S. degree from the University of Washington in Fisheries Biology and an M.S. in Limnology and Oceanography from the University of Wisconsin.
