

Plant Pathology Lab Assistant

The Ornamental Plant Pathology program at WSU Research and Extension Center in Puyallup is seeking a temporary employee to assist with lab work on some of our research projects. The main duties will include: collecting and processing infected plant samples from the field and greenhouse, plating cultures, and assisting with various plant pathology projects. Other responsibilities may include preparing culture media, labeling plates, photographing samples, data collection, data entry, and general lab maintenance duties such as cleaning glassware.

Pay will be \$15/hr. We would like someone who can work part time (20 hrs/week). If you're interested, please send your resume and cover letter to Carmen Barkley: carmen.swannack@wsu.edu.
