

### **Data collection volunteer opportunity**

The Ornamental Plant Pathology program at WSU Puyallup Research and Extension Center is looking for a volunteer to download our dataloggers and weather stations on a regular basis. We expect it will take about two days per month to collect the data and archive it.

Other duties can involve maintaining the equipment, calibrating sensors, and curating the data. If you enjoy working with computers and have an interest in environmental monitoring, this volunteer opportunity is for you!

If you are interested, contact Marianne Elliott ([melliott2@wsu.edu](mailto:melliott2@wsu.edu)) or Gary Chastagner ([chastag@wsu.edu](mailto:chastag@wsu.edu))
