

Washington State University Spokane Health Sciences Online OSHA Respirator Questionnaire Review

Updated 12/04/19

WSU has partnered with MultiCare Occupational Medicine to provide OSHA compliant respirator questionnaire reviews via secure web portal. This replaces paper respirator questionnaires which are completed by hand and delivered to our medical clinic and requires a computer with an internet connection.

Your personal information will be kept strictly private in accordance to Federal HIPPA regulations and MultiCare privacy policy.

Employee instructions:

1. Go to the website shown in the link below.
2. Login using the user name and password shown.
3. Complete the form, which includes:
 - a. Consent
 - b. Personal information
 - c. Work environment relative to respirator use
 - d. Personal health questions
4. You will either be cleared and receive a certificate instantly, or will be asked to call our partner, VestMed for a phone consultation. Following the phone consultation, you will either be cleared for respirator use or referred for a physical respirator examination.
5. WSU Health & Safety will receive results automatically. There is no need to send them separately.
