

GRADUATE SEMINAR SERIES

Lab Safety Seminar

Presented by

WSU Environmental Health & Safety

Please join us for a lab safety seminar presented by representatives from the WSU Environmental Health & Safety (EH&S) office. Topics to be discussed include:

- Chemical and dangerous waste management, with an introduction to resources to assist with safely managing chemical waste.
- Hazard identification and the hierarchy of hazard controls.
- Personal Protective Equipment (PPE) selection, considerations and criteria.
- Applying inherently Safer Design principles to process safety.
- Accident prevention.

Environmental Health and Safety (EH&S) is a non-academic service department dedicated to promoting and supporting the university's efforts to protect human health, safety and the environment. EH&S, with the administration, faculty, staff, and students, develops and implements WSU's safety policies and procedures to establish and maintain a safe and healthy university community. EH&S provides consultation and services in the areas of public health, air and water quality, worker health and safety, and chemical waste disposal and cleanup. For more information, please go to <https://ehs.wsu.edu/>.

Thursday, August 30, 2018

11:00am to Noon

ETRL room 101

Meet the speaker before the seminar in ETRL room 119, 10:30am to 10:50am. Light refreshments will be served.
