

ME 474 – Design for Manufacture and Modern Manufacturing Strategies

<i>Course description:</i>	Design for Manufacture and Assembly; Modern Philosophies and Practices including Lean Manufacturing; Quality control in Manufacturing Systems; Use of Software Tools for Analysis of Manufacturing Cost and Time and evaluation of alternatives.
<i>Number of credits:</i>	3
<i>Course Coordinator:</i>	Lei Li
<i>Prerequisites by course:</i>	ME 310 Manufacturing Process
<i>Prerequisites by topic:</i>	Processes used to produce parts and shapes Fundamentals of materials: Behavior and manufacturing properties
<i>Postrequisites:</i>	None
<i>Textbooks/other required materials:</i>	Required: Product Design for Manufacture and Assembly, 3rd Edition, G. Boothroyd, P. Dewhurst, and W. Knight, Marcel Dekker Inc., ISBN: 978-1-4200-8927-1, 2007. References: Product Design for Manufacture and Assembly, 2nd Edition, 2002, Marcel Dekker Inc., ISBN: 0-8247-0584-X Design for Manufacturability & Concurrent Engineering, 2008, David M. Anderson, CIM Press, ISBN: 1-878072-23-4 Design for Manufacturability Handbook, 2nd Edition, James G. Bralla, McGraw-Hill, ISBN: 0-07-007139-X. Improving Production with Lean Thinking, 2006, Javier Santos, Richard A. Wysk, Jose M. Torres, John Wiley & Sons Inc., ISBN: 0-471-75486-2 The Six Sigma Way, 2000, Peter S. Pande, Robert P. Neuman, Roland R. Cavanagh, McGraw-Hill, ISBN: 0-07-135806-4 Automation, Production Systems, and Computer-Integrated Manufacturing, 3rd Edition, 2008, Mikell P. Groover, Pearson Education Inc., ISBN: 0-13-239321-2
<i>Course objectives:</i>	<ol style="list-style-type: none">1. Understand the complex interrelationships between design and manufacturing2. Explore and understand basic manufacturing processes and the design for manufacturing (DFM) implications of design choices for specific manufacturing processes3. Use assembly considerations and assembly costs in evaluations4. Learn modern manufacturing philosophies and practices5. Understand the role of software applications in evaluating designs for manufacturing and assembly costs; understand approaches and practices related to CAD model building and model checking for specific manufacturing processes such as models for sheet metal and models for casts and molds6. Learn quality related programs in manufacturing
<i>Topics covered:</i>	<ol style="list-style-type: none">1. Introduction to DFMA, Selection of Materials and Processes2. Product Design for Manual Assembly3. Design for Injection Molding4. Design for Sheetmetal Working5. Design for Die-Casting, Sand Casting, and Investment Casting6. Design for Machining

7. Design for other Misc Processes ; Design for Human Factors; Design for X – Reliability, Serviceability, Environment, Disassembly
8. Lean Manufacturing, Toyota Production System, Poka Yoke, QFD
9. Lean Assembly – PQ analysis, Takt time, visualizing assembly process, assembly cells
10. Tolerances
11. Rapid Prototyping; Product Architecture
12. Process variability and control; Statistical Process Control; Six Sigma and DMAIC procedure; Taguchi Methods; ISO 9000

Expected student outcomes:

1. Understand that Design for Manufacture and Assembly (DFMA) is an important aspect of product development and promotes early involvement of manufacturing in design
2. Learn a systematic procedure to analyze a proposed design from the point of view of assembly and manufacturing
3. Quantitatively evaluate the impact of design choices on manufacturing cost
4. Get familiar with key concepts in various new manufacturing paradigms and practices related to lean manufacturing
5. Use modern software tools to accurately model parts for specific manufacturing operations, model part costs, simplify products, find specific avenues to reduce manufacturing and assembly costs, benchmark products, and quantify improvements
6. Be able to use modern quality control concepts and approaches
7. Incorporate these concepts in a project

Class and Laboratory schedule:

Three 50-minute lecture sessions per week, for one semester. This course includes activities where the students are exposed to modern software tools and use them for assignments and projects. Hence lab sessions may be included and arranged as needed.

Contribution to meeting the professional component:

Engineering Topics

Relationship of course to program objectives:

- Meets:
1. School of MME ME educational objectives: 1, 2
 2. School of MME ME program outcomes: (a), (e), (g), (i), (k)
 3. ABET EC2000 Criterion 3 program outcomes: (1), (2), (3), (6), (7)

Prepared by: Lei Li

Date: Oct. 18, 2018

Make-up Policy:

Make-up will be given for tests only in the following cases:

- *Prior permission*
- *University authorized travel/absence*
- *Genuine illness leading to hospitalization or some other emergency*

Academic Integrity

WSU expects all students to behave in a manner consistent with its high standards of scholarship and conduct.

Students are expected to uphold these standards both on and off campus and acknowledge the university's authority to take disciplinary action. The Standards of Conduct for Students can be found at <http://conduct.wsu.edu>

WSU Safety

WSU is committed to maintaining a safe environment for its faculty, staff, and students. Safety is the responsibility of every member of the campus community and individuals should know the appropriate actions to take when an emergency arises. In support of our commitment to the safety of the campus community the University has developed a Campus Safety Plan, <http://safetyplan.wsu.edu>. It is highly recommended that you visit this website as well as the University emergency management web site at <http://oem.wsu.edu/> to become familiar with the information provided.
