Cannabis use in young adults with chronic pain: Effective pain management or maladaptive coping?

The aim of this project is to examine self-management of pain via cannabis use among young adults with chronic pain conditions and to determine whether cannabis use affects acute pain perception, physical functioning, and daily functioning.

Role: Co-Investigator

Funds requested: \$24,450

Completed:

New Faculty Seed Grant

6/2016-8/2018

Washington State University

Does social exclusion influence pain perception and tolerance in healthy adolescents?

This study tested whether the experience of a laboratory-based social stressor influenced adolescents' subsequent perception of and ability to tolerate physical pain. An exploratory aim was to determine whether experience of social exclusion at an initial pain experience influences adolescents' subsequent memory of physical pain intensity.

Role: Principal Investigator

Amount Funded: \$23,307

WSU Grand Challenges Seed Grant

6/2016-8/2018

(PI: Rebecca Craft, PhD; Co-Is: Michael McDonell, PhD., Laura Hill, PhD, Rita Fuchs, PhD, Jessica Fales, PhD)

Marijuana Use: Health Benefits vs. Health Risks

The long-term goal of this seed grant effort was to determine the relative health benefits versus risks of marijuana use.

Role: Co-Investigator

Total Funds Awarded: \$136,982

Sub Award: Health and Wellness Behaviors among Young Adult Marijuana Users

(PI: Jessica Fales, PhD; Co-Is: Renee Magnan, PhD, Benjamin Ladd, PhD, Michael Morgan, PhD)

The objective of this study was to increase understanding of pain prevalence and pain coping behaviors in a young adult sample of regular marijuana users and establish links between use and daily functioning.

Role: Principal Investigator

Funds Awarded: \$15,000

Psychometric validation of a measure of social competence for youth with mixed pain conditions

The goal of this award was to initiate development of a measure of peer-based social competence for youth with mixed pain conditions utilizing a behavioral analytic approach.

Role: Principal Investigator

Funds Awarded: \$5,000

NSF-ADVANCE at Washington State University

10/01/2014-05/01/2016

ADVANCEing EXCELinSE External Mentor Grant

Funding was awarded to help the PI receive mentorship regarding multi-site and interdisciplinary collaborations, program development, and group-based treatment approaches for youth with chronic pain.

Role: Principal Investigator

Funds Awarded: \$3,989

Biopsychosocial Mechanisms of Depression in Adolescent Dating Couples

The goal of this project was to identify interpersonal risk and protective factors for depressive symptomatology in youth. The study examined physiological reactivity and recovery to conflict with one's dating partner as well as links between engagement in potentially maladaptive interpersonal behaviors and adjustment.

Role: Principal Investigator

Funds Awarded: \$66,000

Technological Innovation in Developmental Science: Addressing Maine Issues While Achieving National Preeminence.

This award provided funding for the design, construction, and outfitting of a social interaction laboratory for the developmental faculty and students of the University of Maine's Psychology Department. The MAPI also allowed for the purchase of equipment necessary for the research fellow's pilot and dissertation studies (e.g., specialized computer software, biological assay equipment, and devices to assist with innovative digital-video recall procedures).
