

SYLLABUS

CHEMISTRY 106

SPRING 2015

LECTURES: MWF 8:10AM and 3:10PM Fulmer 226

INSTRUCTORS: Dr. Brian Clowers Fulmer 536A 335-4300 brian.clowers@wsu.edu (subject: CHEM106)
Office Hours: Monday 10:00 – 11:00AM and Tuesday 10:00 – 11:00AM, or by appointment

Dr. Scot Wherland Fulmer 151 335-3360 scot_wherland@wsu.edu
Office Hours: Monday and Thursday 9:00-10:00AM, or by appointment

GENERAL CHEMISTRY OFFICE: Nikki Clark Fulmer 319A 335-1516 nikki_clark@wsu.edu

LABORATORY SUPERVISOR: Ryan Rice Fulmer 309 335-6358 rwrice@wsu.edu

COURSE WEBSITE: Blackboard Learn (Bb) <https://learn.wsu.edu>

GRADING:	3 "midterm" exams	300	GRADE RANGES: (minimum points to achieve)		
	10 tutorial quizzes (best 8)	80	900 points	A	740 points C+
	13 Homework sets (best 10)	50	870 points	A-	700 points C
	38 Reading Assignments (best 30)	90	840 points	B+	670 points C-
	39 Learning Catalytics sets (best 30)	60	800 points	B	640 points D+
	10 laboratory experiments/worksheets	220	770 points	B-	600 points D
	Final Exam	<u>200</u>	Less than 600 points: F		
	TOTAL	1000			

MIDTERM EXAMS:	Thursday	Feb 12	6:00– 7:00 pm	(Chapters 12-14.5 + Experiments 13 & 14)
	Thursday	Mar 12	6:00– 7:00 pm	(Chapters 14.6-16 + Experiments 15 & 16)
	Thursday	Apr 16	6:00– 7:00 pm	(Chapters 17-18 + Experiments 17, 18 & 19)
FINAL EXAM	Monday	May 4	7:00 – 10:00 pm	(Chapters 12-20 + Experiments 20 - 23)

PREREQUISITES for this class are: (You will be dropped if you do not meet these pre-requisites.)

You must have passed Chemistry 105 or its equivalent with a grade of C or better.

You must have passed or been placed beyond Math 106 or Math 107 or the equivalent. Courses that are considered beyond Math 107 are Math 140, 171, 172, 182, or 202.

COURSE OBJECTIVES, LEARNING GOALS AND EXPECTED OUTCOMES: Chemistry 106 is designed to advance students toward the WSU Learning Goals, especially Scientific Literacy, Critical and Creative Thinking, Quantitative Reasoning, and Information Literacy. In particular, students who successfully complete Chemistry 106 will be able to:

1. Complete the development of an understanding of the concepts, models, and theories that form a foundation for the field of chemistry (the understanding of how the behavior of matter is determined by the properties of atoms and molecules) begun in Chemistry 105.
2. Learn the principles of thermodynamics as they apply to chemical equilibrium, including the relationships between equilibrium constants, free energy, enthalpy and entropy.
3. Apply the principles of equilibrium to solubility, pH, and electrochemical equilibrium in aqueous solution.
4. Learn and apply the principles of chemical kinetics as they apply to chemical reactions in general and how they are linked to and contrasted with equilibrium principles.
5. Learn and apply the principles of nuclear reactions, half-life and radiation safety.
6. Learn the basic concepts of organic chemical nomenclature and some principle reactions as a preparation for more advanced study in later courses.

TEXT: *Chemistry: A Molecular Approach* by Tro, 3rd edition, Pearson (2014). ISBN: 978-1-269-93261-5 (hardcover) or 978-1-269-92640-9 (eText). The text and access to the Modified Mastering Chemistry homework site are required. The bookstores have new texts bundled with a Modified Mastering Chemistry access code. Modified

Mastering Chemistry access codes can also be purchased separately at the bookstores or on the publisher's website accessed through Bb.

ONLINE COMPONENTS: There are several aspects of the course, described below, that are accessed through the Mastering Chemistry system, accessed through the Bb using the Mastering Chemistry link on the left of the page. You will need an access code to establish your account. Mastering Chemistry access codes are bundled with new copies of the textbook and sold separately in the bookstores. You may also purchase a Mastering Chemistry registration code or a 14-day free trial, through the Pearson website when you initially register. This initial registration is only through the Bb course website. Detailed instructions for accessing the Mastering system and Learning Catalytics the first time are given at the end of the syllabus. (Required)

LAB TEXT: *Chemistry 105-106 General Chemistry Laboratory Manual* by WSU Chemistry Department, Star Publishing (2014) is required to complete the laboratory portion of this course. (Required)

LABORATORY NOTEBOOK: Duplicating with numbered pages. (Sold in Fulmer 318 the 1st and 2nd week of class and in the bookstores.)

GOGGLES: Required by State Law. (Sold in Fulmer 318 the 1st and 2nd week of class.)

LABORATORY COAT: Required for Chem 106. (sold in Fulmer 318 the 1st and 2nd week of class and at the bookstores.)

CALCULATORS: You are expected to have and to be able to use a scientific calculator. Graphing calculators are allowed but not required. The use of any stored information/programs in a programmable calculator will be considered cheating. Calculators with a full QWERTY keyboard (such as the TI-92 or Voyage 200); PDAs; palmtop, laptop and handheld computers; and cell phone/calculator combinations may not be used during quizzes and examinations. You are responsible for bringing your calculator to all tutorials, lectures, labs and exams.

CLASSROOM DEVICES: In order to participate in the lecture quizzes using Learning Catalytics (part of the Mastering Chemistry package) students must bring to lecture a device that is Wi-Fi enabled and log in to their Mastering Chemistry account in the lecture room. This can be a cell phone, tablet, or laptop.

COURSE WEBSITE: We will be using the Bb course management system for the course website. This can be accessed via <https://learn.wsu.edu>. You are responsible for checking this site regularly. Use your WSU network ID and password to log in. You can also send email to the course instructor, TAs, or other students via the Bb Course Email tool.

FULMER 318/319: All chemistry TA's hold their office hours in Fulmer 318 or 319 (Monday through Thursday from 10 am to 4 pm and 6pm to 9pm, and Friday from 10 am to 1 pm). You may ask any Chem TA for help in this course.

STEPHENSON TUTORS: The Chemistry Department provides tutors for Chem 106 in the Stephenson tutoring center Sunday through Wednesday evening from 6 to 9 pm. These tutors are available to all students in Chem 106.

DISCUSSION FORUMS ON BLACKBOARD LEARN AND FACEBOOK: The Discussion section of Bb is open to everyone involved in the course. Through it you can post questions and get answers from other students as well as the instructors and TAs, and you can see the questions and answers posed by others. There is also a Facebook Community page for Chem 106, located at www.facebook.com/WSUChem106 that will serve as an additional resource.

QUESTIONS ABOUT ELECTRONIC RESOURCES: When encountering difficulties with either Mastering Chemistry or Learning Catalytics, you are encouraged to use the built-in Help & Support system. If you would rather not communicate electronically, you can call Pearson's WSU Priority phone number at (855) 875-1797 or the General Student Help phone number at (800) 677-6337 24-hours a day. The Discussion Forums and Facebook Community are also resources.

LECTURES: Lectures must be attended on a regular basis. You will be expected to read the textbook and complete a Reading Assignment ahead of coming to class. Lectures will supplement and clarify the information from your text

rather than reiterate it. Lectures will focus on problem solving, including Learning Catalytics questions to answer, as described below, and include demonstrations of chemical reactions. *Bring a calculator and Wi-fi enabled device to all lectures.* You are encouraged to form collaborative study groups and to sit with your group members during lecture.

READING ASSIGNMENTS: There will be reading assignments due at 7:30AM before each lecture. These reading assignments are available through the Mastering Chemistry website. The assignments for the week are available from 4:00PM on the previous Friday. They are not a replacement for the reading, but do help you check on your understanding of selected concepts and methods from each text section, and help prepare you for the upcoming lecture. There will be reading assignments for each lecture EXCEPT for the Friday lectures after a midterm exam. Each reading assignment is worth 2 points, and your score is determined by the fraction correct multiplied by the 3 points possible. The best 30 assignments will be counted toward your grade. It is important to note that the completion of these assignments is independent of lecture attendance. If you are sick or out of town, it is still possible to complete the assignments.

LEARNING CATALYTICS: There will be a Learning Catalytics session for each lecture. These sessions are interactive and require a Wi-fi-enabled device, such as a smartphone, laptop, or tablet. You will log in to each session through Bb and then the Mastering Chemistry link, and answer questions posed to you by the instructor throughout the lecture period. This system also allows you to submit questions to the instructor or indicate you do not understand the material, giving real-time feedback to your instructor. Each Learning Catalytics session is worth 2 points. The best 30 assignments will be counted toward your grade. Each assignment is graded on both participation (75%) and correctness (25%). The assignment grade is the assignment fraction multiplied by the 2 points possible.

EXAMS: There will be three midterm exams and a comprehensive final. All exams will be multiple-choice. You will be responsible for bringing a calculator and a pencil to all exams. A bubble-in answer sheet will be provided. No notes or books are allowed. Exams may be given in rooms other than the regular classroom. These rooms will be announced. No make-up exams will be given. If you are unable to take a scheduled midterm exam for academic reasons beyond your control, you will be allowed to schedule the exam at an earlier time. A single midterm exam missed due to illness can be excused with instructor approval, with the other exams plus the final pro-rated to count for more. **By University rule, evening exams take precedence over all other university activities.**

QUIZZES: There will be ten 10-point quizzes of which the best eight will count. Quizzes are given in tutorial. Quizzes will cover lecture, homework and laboratory material. You will be allowed to prepare a single 3" × 5" card containing your HAND-WRITTEN notes for use during each of the quizzes. No other handwritten material and no printed or photocopied material may be used during the quiz, except for an approved periodic table (the table that appears on the back of your laboratory manual).

HOMEWORK: There will be weekly homework assignments administered through the Mastering Chemistry website accessed through Bb.

A new homework assignment will be made available each week (no later than 7:30AM each Tuesday). Each assignment must be completed by 7:30AM the following Tuesday. The due date/time for each assignment will be listed with the assignment on the homework site. Each homework set will be pro-rated to have a value of 4 course points, by taking the fraction correct and multiplying it by the 4 points possible.

You are encouraged to use the available Hints. You will neither gain nor lose points for the use of the Hints.

Each homework assignment has an **Adaptive Follow-up** assignment due at 7:30AM the Saturday after the homework assignment is due. This is additional practice on homework concepts with which you had difficulty. If you score 90% or higher on the homework assignment, you are automatically awarded the point for the Adaptive Follow-up once you open it. If you score below 90%, you must complete the follow-up assignment to be awarded this point. It is calculated as the fraction of the points you earn for the Adaptive Follow-up assignment, times 1.

The overall homework score is thus out of 5 points each week. The best 10 assignments will count toward your grade. After the due date you may still earn points, but the number of points is decreased by 10% per day to a maximum penalty of 50% until the exam that includes that chapter, after this time no points may be earned.

TUTORIALS: These are small classroom meetings associated with your laboratory section and led by your TA. Students who miss tutorial will **not** be allowed into the lab. Quizzes are given in tutorial most weeks (see the course

schedule). Tutorials are interactive problem solving sessions driven by your questions. Bring your text, lab manual and calculator to tutorial. Pre-labs and lab reports are due at the start of tutorial. Help with pre-labs and lab reports will not be available in tutorial as they must be completed before attending tutorial. **Tutorial sessions are never canceled!** If your TA fails to arrive for a tutorial section, send one person to contact the General Chemistry office (335-1516, Fulmer 319A) immediately. All others must remain in the tutorial room until the TA or a substitute arrives. Students who leave tutorial under these circumstances will forfeit all points associated with that tutorial/laboratory session (lab report, lab, and quiz).

LABORATORIES: Your course section includes a lecture time and a laboratory time. This is a laboratory UCORE course, and the laboratory must be completed in order to pass the course. Thus, obtaining a score of zero for 3 or more experiments will result in an F for the course.

Make-up labs: Labs missed for reasons beyond your control, may be made up, on a space available basis, in the same week that the lab is missed. You will be allowed to make up a maximum of two labs per semester in this manner. Permission for a make-up lab must be obtained, in writing, from the Chemistry Office, Fulmer 319A. The permission slip will be collected and signed by the make-up TA. **We cannot guarantee that make-up space will be available.** If you know in advance that you will miss a lab, visit Fulmer 319A as soon as possible in order to maximize the chance that make-up space will be available. **If make-up space is not available:** Bring your completed pre-laboratory assignment to Ryan Rice's office (Fulmer 309) to be supplied with make-up data for the scheduled experiment. Do this as soon as you can! Reports based on make-up data are due at the normal time (in tutorial one week after you should have attended lab) and will be worth no more than ½ credit.

Pre-laboratory assignments: Pre-laboratory assignments are due at the start of the tutorial. Students who fail to submit a complete pre-lab assignment at this time will be assessed a late penalty on the full report and be required to complete the pre-lab assignment before they are admitted to lab. The student will not be given extra time in the laboratory to make up for laboratory time spent completing the pre-lab.

Laboratory procedure: Students are to perform the experiments individually unless the laboratory manual specifically requires partners for the experiment being performed. Each student is expected to record all data and observations for each experiment directly into their own laboratory notebook. Data may not be recorded on loose, 'scratch' paper then transferred to the notebook. Submission of identical data by two or more students who are not assigned to be laboratory partners will be considered cheating. Appropriate penalties will be applied to all parties. Some experiments will require you to transfer data from your notebook into a laboratory computer before you leave lab. The data and any computer-generated data must be written in the notebook! You are required to get your TA's signature on your data/observations at the end of the experiment. You will then submit the original copy of the data to your TA before you leave lab.

Laboratory dress code: For your safety, a strict dress code will be enforced in the laboratory. Failure to comply with the dress code will result in expulsion from the laboratory and a consequent score of zero for that experiment. The dress code requires that you be fully clothed from shoulder to toe. No shorts, short skirts, or shoes that do not cover the entire foot are permitted. It is required that you wear a full-length lab coat. This will adequately cover the upper body, but your legs, ankles and feet must be covered by your 'street clothing'.

Laboratory reports: Post-laboratory reports will be due at the start of the tutorial in the week shown on the course schedule. Failure to submit a post-lab for an experiment will result in zero credit for that experiment (no credit will be given for the pre-lab or data and observations sections in the absence of a submitted post-lab.)

Adjustments to laboratory scores: The instructor will make every effort ensure that the grading of laboratory reports is consistent and fair. To this end, the instructors reserve the right to normalize the laboratory scores from the different laboratory instructors to the same average. Any such adjustment will be made at the end of the semester after all scores have been submitted. TA performance will be assessed throughout the semester with the goal of eliminating any necessity for these adjustments. Students are encouraged to bring any concerns about the equity of the grading process to the attention of the course instructor.

CLASS POLICY ON LATE (OR EARLY) ASSIGNMENTS:

Laboratory reports: Late laboratory reports will be penalized by the loss of 20% of the total points per day (or portion thereof) that they are late. *Reports submitted after the start of tutorial are a day late!* This penalty is

applied after the normal grading of the report. Late penalties are applied to the entire experiment, not just the portion of the report that is late. Late penalties assessed for different parts of the report are cumulative. Reports submitted more than one week late will receive zero points. No reports will be accepted after 5:00PM on the last day of classes (Friday, May 1, 2015) even if they are not yet one week late.

Early submission: If you know that you will not be present at the time a laboratory report is due, they may be submitted early without penalty. Homework and Reading assignments may be completed on the Mastering Chemistry system as soon as the assignment is posted.

Method of submission: It is best to personally deliver late or early submissions to the instructor or TA. Note that, outside of class/laboratory times and posted office hours, we make no pledge to be present or available for this purpose. If you are submitting work at other than the specified time, it is your responsibility to find us. Material may be submitted to Fulmer 319A during normal business hours (8:00AM-5:00PM M-F). Assignments delivered in any other way (slid under the instructor's or 319's office door, for example) will be considered to have been submitted at the time they are found, if they are found.

Procedure for submission

- Write your TA's name at the top of the assignment.
- Time-stamp your assignment using the time-stamping machine in Fulmer 319A.
- Place your assignment on the 106 shelf in Fulmer 319A (next to the time-stamp machine).

ACADEMIC INTEGRITY: Cheating or plagiarism in any form will not be tolerated. Cheating includes, but is not limited to: copying work **OR** allowing your work to be copied; use of unauthorized material at quizzes and exams, any communication between students during a quiz or exam, and actively looking at another student's paper during a quiz or exam. Students repeating the course must rework and rewrite all assignments. Plagiarism includes resubmitting previously graded homework or lab reports from a previous semester, even if they were your own work. Plagiarism also includes using laboratory data from another person or a previous semester. Obtaining information about quizzes taken in other sections is considered cheating. Use of any electronic device other than an approved calculator during a quiz or examination is cheating. All incidences of cheating will be reported to the Office of Student Affairs. The first incidence of cheating will result in a score of zero for that assignment, quiz or exam. A second incident of cheating will result in an F for the course and possible dismissal from the University.

ACCOMODATIONS: Reasonable accommodations are available for students who have a documented disability. If you need accommodations to fully participate in this class, please visit the Access Center. All accommodations **MUST** be approved through the Access Center (Washington Bldg, Room 217). Please stop by or call 509-335-3417 to make an appointment with an Access Advisor. Further information is available at <http://accesscenter.wsu.edu>.

Getting started with Modified Mastering and Blackboard

1. Log in to Blackboard Learn Learning Management System (<https://learn.wsu.edu>), using your network ID and password. Select the course “Principles of Chemistry II”. From there, look for the link to “**Mastering Chemistry**” on the left and click it to begin the registration process.
2. Click the button “**Mylab and Mastering Course Home**”
3. Accept the user agreement.
4. You will be prompted to log in with your Pearson account. If you have a Pearson account, enter the username and password. If you do not remember your username and/or password, then use the help provided through Pearson to get this information. If you establish a new account, then you will have to pay again. If you have **never** had a Pearson account select the option to “**Create a New Pearson Account**” and do so. Be sure to record your username and password.
5. If you purchased the textbook bundle from the bookstore, or otherwise purchase the Modified Mastering Chemistry access code, click the button labelled “**Access Code**” and enter your access code on the next screen (replacing the sample code). Keep a record of this code also. Otherwise purchase instant access now by clicking on the purchase options under the “**Use a Credit Card or PayPal**” section. You may also select Temporary Access without payment for 14 days.
6. You are now registered! Click on the “**Go to your course**” button to access Mastering Chemistry.

SCHEDULE

CHEMISTRY 106

SPRING 2015

Wk	Date	Chapter	Topic	Laboratory Experiment	Lab report due	Quiz/ Exam	Homework Due
1	Jan 12-16	12.1-12.4	Solutions	13: Intro to Qualitative Analysis	13 10 pts	None	None
2*	Jan 19-23	12.5-13.2	Complete Solutions, Chemical Kinetics	14: Qualitative Analysis of Cations, Prelab	None	Quiz 1	Intro & Hw #1 Mon 1/19
3	Jan 26-30	13.3-13.7	Complete Chemical Kinetics	14: (continued)	None	Quiz 2	Hw #2 Mon 1/26
4	Feb 2-6	14.1-14.5	Chemical Equilibrium	15: Qualitative Analysis of Anions, Prelab	14 35 pts	Quiz 3	Hw #3 Mon 2/2
5	Feb 9-13	14.6-14.9	Complete Chemical Equilibrium	15: (continued)	None	Exam 1 Thu 2/12	Hw #4 Mon 2/9
6*	Feb 16-20 Presidents' Day	15.1-15.6	Acids and Bases	15: (continued)	None	Quiz 4	Hw #5 Mon 2/16
7	Feb 23-27	15.7-15.10	Complete Acids and Bases	16: Unknown Anions, Prelab	15 35 pts	Quiz 5	Hw #6 Mon 2/23
8	Mar 2-6	16.1-16.7	Aqueous Ionic Equilibrium	17: Unknown Cations, Prelab	16 15 pts	Quiz 6	Hw #7 Mon 3/2
9#	Mar 9-13	17.1-17.6	Free Energy and Thermodynamics	18: Unknown Salt, Prelab	17 15 pts	Exam 2 Thu 3/12	Hw #8 Mon 3/9
	Mar 16-20	SPRING BREAK					
10	Mar 23-27	17.7-17.9	Complete Free Energy and Thermodynamics	19: Colorimetric Determination of Concentration, Prelab	18 10 pts	None	None
11	Mar 30-Apr 3	18.1-18.5	Electrochemistry	20: Determining an Equilibrium Constant, Prelab	19 20 pts	Quiz 7	Hw #9 Mon 3/30
12	Apr 6-10	18.6-18.9	Complete Electrochemistry	23: Voltaic Cells, Prelab	20 20 pts	Quiz 8	Hw #10 Mon 4/6
13	Apr 13-17	19.1-19.9	Radioactivity and Nuclear Chemistry	22: Determining the pK _a of a Weak Acid, Prelab	23 20 pts	Exam 3 Thu 4/16	Hw #11 Mon 4/13
14	Apr 20-24	20.1-20.9	Organic Chemistry	21: Kinetics, Rate Law & Activation Energy, Prelab	22 20 pts	Quiz 9	Hw #12 Mon 4/20
15	Apr 27-May 1		Complete Organic Chemistry and Review	Course Evaluations Online	21 20 pts	Quiz 10 (make-up quiz)	Hw #13 Mon 4/27
16	May 4	FINAL EXAM: Monday, May 4, 2015, 7:00-10:00PM					

* No Monday lecture due to holiday, homework is still due on Monday 11:59PM.

No Friday lecture.
