Apr 24	Olatunji, Paul; Roberts, Brad	Both are research updates

Literature talks: Students will discuss a paper or focused set of papers on the topic of their choice. These 25 minute talks are to be given using PowerPoint and should include: bibliographic information, background to the work, the paper's key results, and the significance of the work.

Research talks: In these 50 minute talks, students will discuss their research project's objectives and their approach, present relevant background material, summarize their experimental results, note any problems encountered and suggest solutions, and discuss future directions.

Research updates: These are abbreviated versions (25 minutes) of the research presentations in which students will present experimental results obtained since their previous talk.
