Literature presentations: Students will discuss a paper or focused set of papers on the topic of their choice. These 30 minute talks are to be given using PowerPoint and should include: bibliographic information, background to the work, the paper's key results, and the significance of the work.

Research presentations: In these 50 minute talks, students will discuss their research project's objectives and their approach, present relevant background material, summarize their experimental results, note any problems encountered and suggest solutions, and discuss future directions.

*Schedule may also include faculty presentations, proposal defenses, and special organic seminars.
