Washington State University College of Education
This is Jane Elliott, the elementary educator who, on the day after Martin Luther King, Jr. was assassinated, created a microcosm of society in her third-grade classroom, in order to help the all-white, all-Christian students develop empathy for those who were different from themselves, in the United States of America. Her Blue-eyes, Brown-eyes Exercise, has been the topic of numerous videos and much discussion, world-wide.
