

# WELCOME NATIONAL SCIENCE FOUNDATION WORKSHOP

## NSF PROGRAM DIRECTORS:

Sarah Ruth, *Sustainability Research Networks*

David Fountain, *Interdisciplinary Research in Hazards and Disasters*

Simon Malcomber, *Dimensions of Biodiversity*

George Maracas, *Sustainable Energy Pathways*

Jessica Robin *Science, Engineering and Education for Sustainability*

NSF has initiated the Science, Engineering and Education for Sustainability (SEES) program as an agency-wide area of investment. The mission statement for SEES is to *advance science, engineering, and education to inform the societal actions needed for environmental and economic sustainability and sustainable human well-being.*

In this workshop, we will have the opportunity to hear directly from NSF SEES program directors about the breadth of SEES funding opportunities. We will then explore WSU strengths in line with the SEES mission and begin to form faculty teams to pursue these opportunities.

***Don't miss the chance to be part of our next big successful NSF proposal!***
